Achieva™ Selectable Center Basket

Achieva™ Selectable Lumens and CCT Troffer
1x4 / 2x2 / 2x4

Typical Applications

Offices • Education • Healthcare • Retail

Interactive Menu

- Order Information/Performance page 2
- Photometric Data page 5
- Product Specifications page 6
- Control Solutions page 8
- Product Warranty

Top Product Features

- Selectable lumens (low/medium/high) and selectable CCT (3500K/4000K/5000K) in both 80 or 90 CRI for use in a variety of applications and stock simplicity
- Selectable lumens offered in both standard selectable and high output selectable options
- Available in Round or Square lens options
- Shallow plenum - 1.5" depth fits the most challenging spaces
- 0-10V dimming to 5% standard with 120-277V UNV
- Fully assembled driver integrated without exposed wires in the plenum
- Emergency, Wavelinx, and Flex options available
- Matches Achieva Surface for one family look across a space (coming Q4)

Metalux**Achieva Selectable Troffer****Achieva Product Specifications****Construction**

- Die formed of code gauge prime cold rolled steel in one-piece housing design
- Four auxiliary fixture end suspension points
- Integral formed one-piece housing improves aesthetic design removing end plate light gaps
- Integrated T-Grid clip design for screw installation to the grid where required by code and in "earthquake" zones

Integrated Controls

- Standard 0-10V dimming driver down to 5%
- Integrated WaveLinx options provide wireless individual fixture control and enable code compliance, increased energy savings, grouping of fixtures, and connection to WaveLinx control system
- Available in 80 CRI or 90 CRI color quality

LED and Light Engine

- Selectable Color temperature choices 3500K, 4000K, and 5000K
- Selectable lumen output up to 8000 lumens, with choices of low, medium, high
- TM21 life at 60,000 hours up to L94 and calculated L70 exceeds 290,000 hrs.
- Driver 120-277V Standard

Emergency Options

- Optional emergency battery available in 7W and 14W
- 90-minute backup period for code compliance
- Factory installed integral test switch visible from room side

Finish

- Powder Coat matte white
- 90% reflective, matte white enamel finish
- Full fixture housing painted after fabrication

Shielding

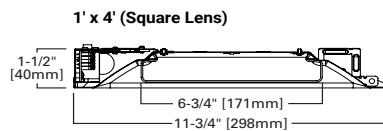

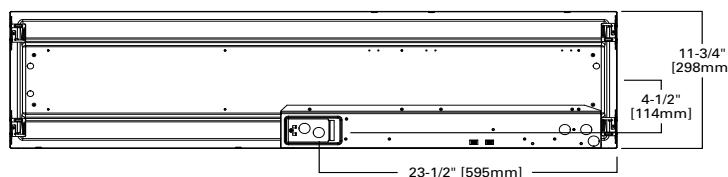

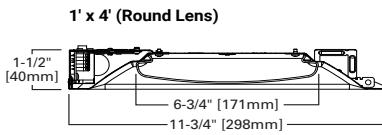

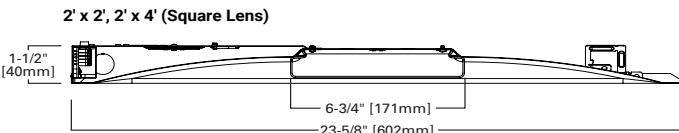

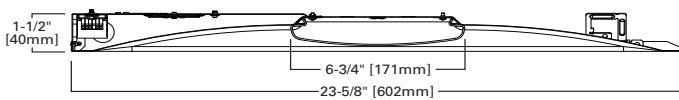

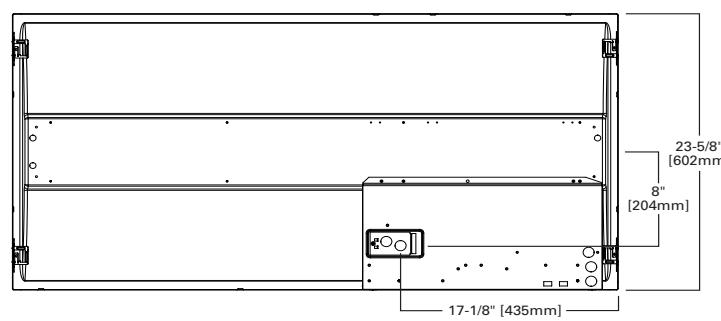

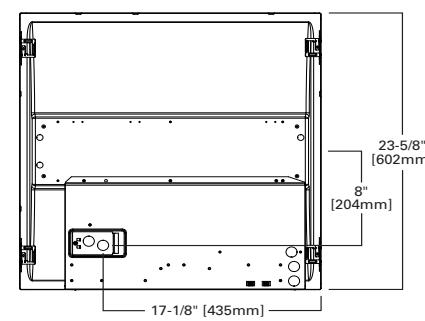

- Rounded ribbed frosted lens standard
- Square ribbed frosted lens option

Compliance

- IC rated for insulation contact
- cULus listed for damp locations
- RoHS compliant
- Tested to IESNA LM-79 and LM-80
- Stated life tested to TM21 standards
- Can be used for State of California Title 24 high efficacy luminaire
- Can be used for Non-residential T24
- DesignLights Consortium® Qualified and classified for DLC Standard and DLC Premium (refer to www.designlights.org)

Limited Warranty

- Five-year warranty standard. Optional ten year warranty available.

Dimensional and Mounting Details - Round Lens**2' x 2', 2' x 4' (Round Lens)****2' x 4'****2' x 2'**

Integrated Sensor Coverage Pattern

TOP VIEW:

SIDE VIEW:

Note: Installation of integrated sensors within 3-ft (1m) of HVAC air vents is not recommended. The pattern shown is intended solely as a general guide and is not to scale.

The ARS with WaveLinx offers no-hassle lighting control with multiple luminaire level control solutions.

WaveLinx PRO is a wireless lighting control solution, for connected spaces, that significantly reduces a building's energy consumption. From a single floor to an entire campus, WaveLinx PRO connects more than lighting assets; it shares aggregated sensor data with the WaveLinx CORE platform and other building systems, so building owners can improve operations, spaces environment, and tenants' experience. WaveLinx PRO offers a rich portfolio of wireless devices, WaveLinx PRO-enabled luminaires, and an intuitive WaveLinx mobile app for office, education, warehouse, and parking garage applications.

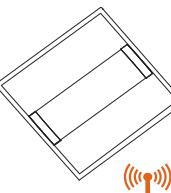

WaveLinx LITE is a cost effective, wireless digital lighting control solution, with out-of-the-box functionality, that saves energy and meets code. It's designed for applications that require occupancy-based, daylighting, or manual light control. Customize installations for office, education, warehouse and parking garages using the secure, simple mobile app.

With Integrated WaveLinx Sensor

With Integrated WaveLinx Node

Add a hidden WaveLinx sensor node (WPN, WLN) to your space lighting design!

Allows to:

- Keeps luminaire aesthetics
- Connect fixtures without the realestate to include sensor option such as downlights
- Connect sealed fixtures without a standard sensor option such as products for clinical space.

Integrated Controls Options

Option	Out of the Box Functionality	Luminaire Level Lighting Control (LLLC)	Automatic Dimming Photocell	Occupancy Sensing	CCT Control
WLS	X	X	X	X	
WLN		X			
WPS		X	X	X	X
WPN		X			X

Note: WaveLinx utilizes scenes to allow users to change an area's fixtures Correlated Color Temperature (CCT) and intensity using commissioned manual wireless wallstation scene control. To enable CCT adjustments through WaveLinx, include WPS or WPN devices in addition to VividTune or BioUp technologies for integrated fixture control.

Systems comparison chart

Cooper Lighting Solutions provides many lighting system solutions designed to satisfy code requirements and meet the unique needs of any project.

Achieva™ Selectable Center Basket

Achieva™ Selectable Lumens and CCT Troffer
1x4 / 2x2 / 2x4

Typical Applications

Offices • Education • Healthcare • Retail

Interactive Menu

- Order Information/Performance page 2
- Photometric Data page 5
- Product Specifications page 6
- Control Solutions page 8
- Product Warranty

Top Product Features

- Selectable lumens (low/medium/high) and selectable CCT (3500K/4000K/5000K) in both 80 or 90 CRI for use in a variety of applications and stock simplicity
- Selectable lumens offered in both standard selectable and high output selectable options
- Available in Round or Square lens options
- Shallow plenum - 1.5" depth fits the most challenging spaces
- 0-10V dimming to 5% standard with 120-277V UNV
- Fully assembled driver integrated without exposed wires in the plenum
- Emergency, Wavelinx, and Flex options available
- Matches Achieva Surface for one family look across a space (coming Q4)

Metalux**Achieva Selectable Troffer****Achieva Product Specifications****Construction**

- Die formed of code gauge prime cold rolled steel in one-piece housing design
- Four auxiliary fixture end suspension points
- Integral formed one-piece housing improves aesthetic design removing end plate light gaps
- Integrated T-Grid clip design for screw installation to the grid where required by code and in "earthquake" zones

Integrated Controls

- Standard 0-10V dimming driver down to 5%
- Integrated WaveLinx options provide wireless individual fixture control and enable code compliance, increased energy savings, grouping of fixtures, and connection to WaveLinx control system
- Available in 80 CRI or 90 CRI color quality

LED and Light Engine

- Selectable Color temperature choices 3500K, 4000K, and 5000K
- Selectable lumen output up to 8000 lumens, with choices of low, medium, high
- TM21 life at 60,000 hours up to L94 and calculated L70 exceeds 290,000 hrs.
- Driver 120-277V Standard

Emergency Options

- Optional emergency battery available in 7W and 14W
- 90-minute backup period for code compliance
- Factory installed integral test switch visible from room side

Finish

- Powder Coat matte white
- 90% reflective, matte white enamel finish
- Full fixture housing painted after fabrication

Shielding

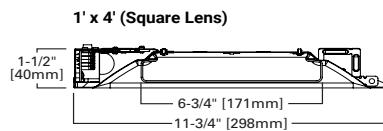

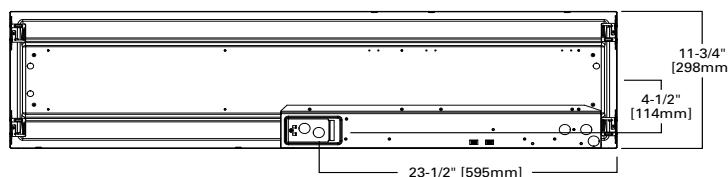

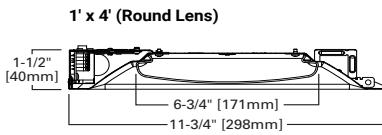

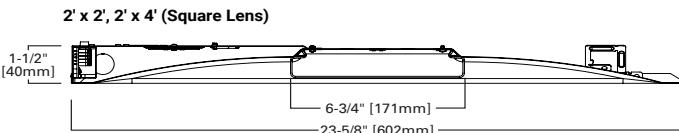

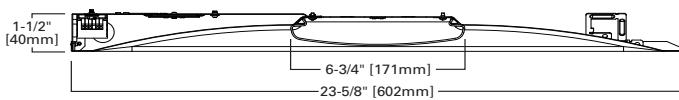

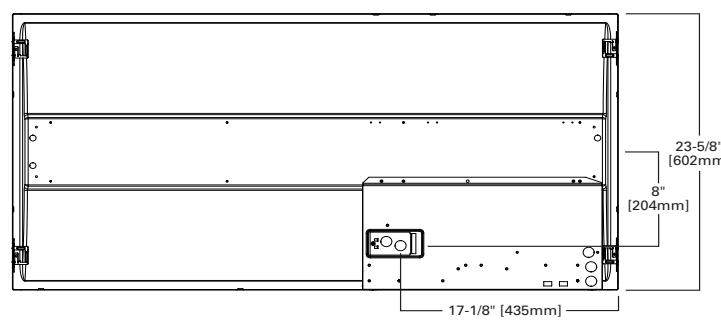

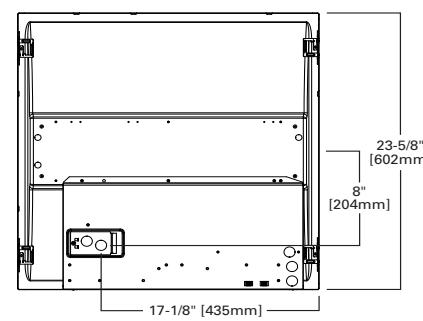

- Rounded ribbed frosted lens standard
- Square ribbed frosted lens option

Compliance

- IC rated for insulation contact
- cULus listed for damp locations
- RoHS compliant
- Tested to IESNA LM-79 and LM-80
- Stated life tested to TM21 standards
- Can be used for State of California Title 24 high efficacy luminaire
- Can be used for Non-residential T24
- DesignLights Consortium® Qualified and classified for DLC Standard and DLC Premium (refer to www.designlights.org)

Limited Warranty

- Five-year warranty standard. Optional ten year warranty available.

Integrated Sensor Coverage Pattern

TOP VIEW:

SIDE VIEW:

Note: Installation of integrated sensors within 3-ft (1m) of HVAC air vents is not recommended. The pattern shown is intended solely as a general guide and is not to scale.

The ARS with WaveLinx offers no-hassle lighting control with multiple luminaire level control solutions.

WaveLinx PRO is a wireless lighting control solution, for connected spaces, that significantly reduces a building's energy consumption. From a single floor to an entire campus, WaveLinx PRO connects more than lighting assets; it shares aggregated sensor data with the WaveLinx CORE platform and other building systems, so building owners can improve operations, spaces environment, and tenants' experience. WaveLinx PRO offers a rich portfolio of wireless devices, WaveLinx PRO-enabled luminaires, and an intuitive WaveLinx mobile app for office, education, warehouse, and parking garage applications.

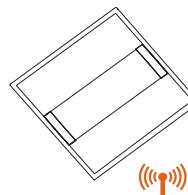

WaveLinx LITE is a cost effective, wireless digital lighting control solution, with out-of-the-box functionality, that saves energy and meets code. It's designed for applications that require occupancy-based, daylighting, or manual light control. Customize installations for office, education, warehouse and parking garages using the secure, simple mobile app.

With Integrated WaveLinx Sensor

With Integrated WaveLinx Node

Add a hidden WaveLinx sensor node (WPN, WLN) to your space lighting design!

Allows to:

- Keeps luminaire aesthetics
- Connect fixtures without the realestate to include sensor option such as downlights
- Connect sealed fixtures without a standard sensor option such as products for clinical space.

Integrated Controls Options

Option	Out of the Box Functionality	Luminaire Level Lighting Control (LLLC)	Automatic Dimming Photocell	Occupancy Sensing	CCT Control
WLS	X	X	X	X	
WLN		X			
WPS		X	X	X	X
WPN		X			X

Note: WaveLinx utilizes scenes to allow users to change an area's fixtures Correlated Color Temperature (CCT) and intensity using commissioned manual wireless wallstation scene control. To enable CCT adjustments through WaveLinx, include WPS or WPN devices in addition to VividTune or BioUp technologies for integrated fixture control.

Systems comparison chart

Cooper Lighting Solutions provides many lighting system solutions designed to satisfy code requirements and meet the unique needs of any project.

Product Features

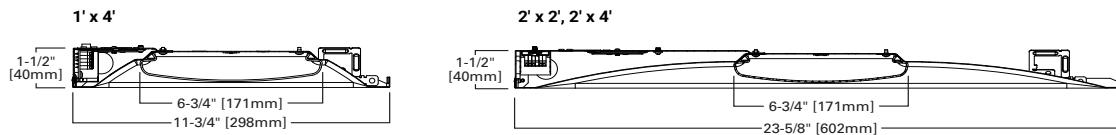

Top Product Features

- Selectable lumens (low/medium/high) and selectable CCT (3500K/4000K/5000K) for use in a variety of applications and stock simplicity
- Selectable lumens offered in both standard selectable and high output selectable options
- Shallow plenum - 1.5" depth fits the most challenging spaces
- 0-10V dimming to 5% standard with 120-277V UNV
- Fully assembled driver integrated without exposed wires in the plenum.
- Emergency, Wavelinx, and Flex options available
- Integrated grid clips with holes for retaining wire and end hole to enable secure attachment to the grid where required
- Matches Achieva Surface for one family look across a space (Coming Q4)

Metalux

Achieva Selectable Troffer

Achieva Product Specifications

Construction

- Die formed of code gauge prime cold rolled steel in one-piece housing design
- Four auxiliary fixture end suspension points
- Integral formed one-piece housing improves aesthetic design removing end plate light gaps
- Integrated T-Grid clip design for screw installation to the grid where required by code and in "earthquake" zones

Integrated Controls

- Standard 0-10V dimming driver down to 5%

LED and Light Engine

- Selectable Color temperature choices 3500K, 4000K, and 5000K
- Selectable lumen output up to 8000 lumens, with choices of low, medium, high
- TM21 life at 60,000 hours up to L94 and calculated L70 exceeds 290,000 hrs.
- Driver 120-277V Standard

Emergency Options

- Optional emergency battery available in 7W and 14W
- 90-minute backup period for code compliance
- Factory installed integral test switch visible from room side

Finish

- Powder Coat matte white
- 90% reflective, matte white enamel finish
- Full fixture housing painted after fabrication

Shielding

- Rounded ribbed frosted lens standard
- Square ribbed frosted option coming Q1 (Consult Factory)

Compliance

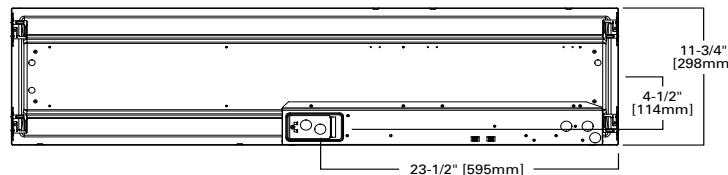

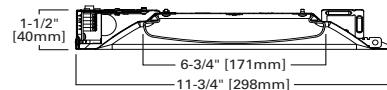

- IC rated for insulation contact
- cULUs listed for damp locations
- RoHS compliant
- Tested to IESNA LM-79 and LM-80
- Stated life tested to TM21 standards
- Can be used for State of California Title 24 high efficacy luminaire
- Can be used for Non-residential T24
- DesignLights Consortium® Qualified and classified for DLC Standard and DLC Premium (refer to www.designlights.org)

Limited Warranty

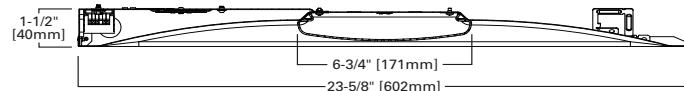

- Five-year warranty standard. Optional ten year warranty available.

Top Product Features

- Selectable lumens (low/medium/high) and selectable CCT (3500K/4000K/5000K) in both 80 or 90 CRI for use in a variety of applications and stock simplicity
- Selectable lumens offered in both standard selectable and high output selectable options
- Available in Round or Square lens options
- Shallow plenum - 1.5" depth fits the most challenging spaces
- 0-10V dimming to 5% standard with 120-277V UNV
- Fully assembled driver integrated without exposed wires in the plenum
- Emergency, Wavelinx, and Flex options available
- Matches Achieva Surface for one family look across a space (coming Q4)

Metalux**Achieva Selectable Troffer****Achieva Product Specifications****Construction**

- Die formed of code gauge prime cold rolled steel in one-piece housing design
- Four auxiliary fixture end suspension points
- Integral formed one-piece housing improves aesthetic design removing end plate light gaps
- Integrated T-Grid clip design for screw installation to the grid where required by code and in "earthquake" zones

Integrated Controls

- Standard 0-10V dimming driver down to 5%
- Integrated WaveLinx options provide wireless individual fixture control and enable code compliance, increased energy savings, grouping of fixtures, and connection to WaveLinx control system
- Available in 80 CRI or 90 CRI color quality

LED and Light Engine

- Selectable Color temperature choices 3500K, 4000K, and 5000K
- Selectable lumen output up to 8000 lumens, with choices of low, medium, high
- TM21 life at 60,000 hours up to L94 and calculated L70 exceeds 290,000 hrs.
- Driver 120-277V Standard

Emergency Options

- Optional emergency battery available in 7W and 14W
- 90-minute backup period for code compliance
- Factory installed integral test switch visible from room side

Finish

- Powder Coat matte white
- 90% reflective, matte white enamel finish
- Full fixture housing painted after fabrication

Shielding

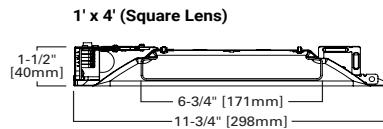

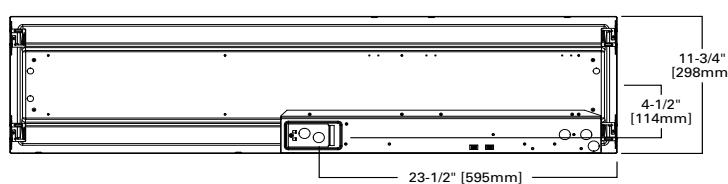

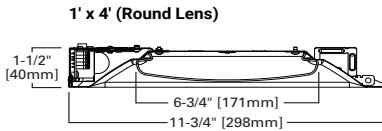

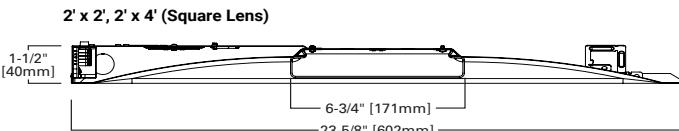

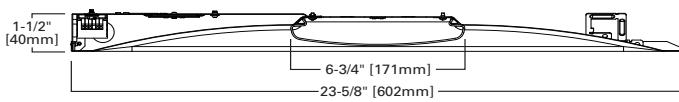

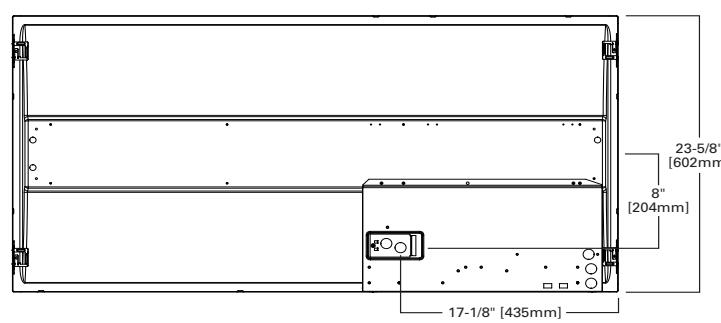

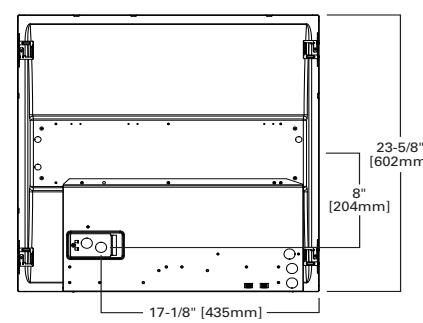

- Rounded ribbed frosted lens standard
- Square ribbed frosted lens option

Compliance

- IC rated for insulation contact
- cULus listed for damp locations
- RoHS compliant
- Tested to IESNA LM-79 and LM-80
- Stated life tested to TM21 standards
- Can be used for State of California Title 24 high efficacy luminaire
- Can be used for Non-residential T24
- DesignLights Consortium® Qualified and classified for DLC Standard and DLC Premium (refer to www.designlights.org)

Limited Warranty

- Five-year warranty standard. Optional ten year warranty available.

Integrated Sensor Coverage Pattern

TOP VIEW:

SIDE VIEW:

Note: Installation of integrated sensors within 3-ft (1m) of HVAC air vents is not recommended. The pattern shown is intended solely as a general guide and is not to scale.

The ARS with WaveLinx offers no-hassle lighting control with multiple luminaire level control solutions.

WaveLinx PRO is a wireless lighting control solution, for connected spaces, that significantly reduces a building's energy consumption. From a single floor to an entire campus, WaveLinx PRO connects more than lighting assets; it shares aggregated sensor data with the WaveLinx CORE platform and other building systems, so building owners can improve operations, spaces environment, and tenants' experience. WaveLinx PRO offers a rich portfolio of wireless devices, WaveLinx PRO-enabled luminaires, and an intuitive WaveLinx mobile app for office, education, warehouse, and parking garage applications.

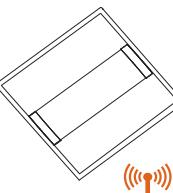

WaveLinx LITE is a cost effective, wireless digital lighting control solution, with out-of-the-box functionality, that saves energy and meets code. It's designed for applications that require occupancy-based, daylighting, or manual light control. Customize installations for office, education, warehouse and parking garages using the secure, simple mobile app.

With Integrated WaveLinx Sensor

With Integrated WaveLinx Node

Add a hidden WaveLinx sensor node (WPN, WLN) to your space lighting design!

Allows to:

- Keeps luminaire aesthetics
- Connect fixtures without the realestate to include sensor option such as downlights
- Connect sealed fixtures without a standard sensor option such as products for clinical space.

Integrated Controls Options

Option	Out of the Box Functionality	Luminaire Level Lighting Control (LLLC)	Automatic Dimming Photocell	Occupancy Sensing	CCT Control
WLS	X	X	X	X	
WLN		X			
WPS		X	X	X	X
WPN		X			X

Note: WaveLinx utilizes scenes to allow users to change an area's fixtures Correlated Color Temperature (CCT) and intensity using commissioned manual wireless wallstation scene control. To enable CCT adjustments through WaveLinx, include WPS or WPN devices in addition to VividTune or BioUp technologies for integrated fixture control.

Systems comparison chart

Cooper Lighting Solutions provides many lighting system solutions designed to satisfy code requirements and meet the unique needs of any project.

Product Specifications

Housing

- One piece spun aluminum gasketed surface ceiling mount housing cylinder
- Available in matte white, matte metallic silver and dark bronze finishes
- May be used for new construction or renovation work on protected covered ceilings

Universal Mounting Bracket

- Provided with mounting pattern for direct installation to most standard 4" round, 3-1/2" and 4" octagonal or 4" square junction boxes

LED Module

- Integrated self-flanged shallow reflector with multiple finish options
- Patented SeleCCTable™ color temperature technology and selectable lumen output for selection in the field
- Integrated dip switches for selectable color and lumen selection in the field
- Selectable CCT 3000K/3500K/4000K
- Selectable lumen ranges:
 - Low Lumen:
 - Small - Shallow cylinder for 1000lm, 1500lm, 2000lm (nominal)
 - High Lumen:
 - Large - Deep cylinder for 2000lm, 3000lm, 4000lm (nominal)
- Discrete (fixed) lumen models, use to meet lighting power density codes
 - Low Lumen:
 - Small - shallow cylinder 1000lm
 - Small - Shallow cylinder 1500lm
 - High Lumen:
 - Large - Deep cylinder 3000lm (nominal)
- Available in 80 CRI or 90 CRI (nominal) with color accuracy within 3 SDCM
- LED array uses a plurality of mid-power surface mount LEDs delivering high flux and excellent efficiency.
- Passive cooling achieves L70 at 50,000 hours
- Integral connector for quick link to the housing flex

LED Module - Optics

- Lens included offers medium / wide beam options
- Lens ships in medium beam. Twist-to-lock feature allows conversion to wide beam in the field without tools.
- Micro-prismatic lens is precision formed optical polymer
- Louvered Wall Wash
 - Optional field installed wall wash kit offers 360° rotation, allowing the housing to be installed in any orientation.

LED Module - Reflector

- Integrated self-flanged shallow reflector with LED array and lens
- Finish paint options: matte white, matte metallic silver, and dark bronze
- Standard torsion springs on module to be replaced by a set of short torsion springs included with surface cylinders for field installation

LED Module - Retention

- Module/reflector is securely retained with (2) short torsion springs holding the flange tightly to the housing
- Set of (2) short torsion springs included with surface cylinders for field installation in place of standard springs as shipped on module

Driver

- Field replaceable constant current driver provides low noise operation
- UNV 120-277VAC 50/60Hz input standard
- Continuous 1% - 100% dimming with 0-10V analog controls

Compliance

- cULus Certified to UL 1598 / C22.2 No. 250.0, suitable for damp locations and wet locations in covered ceilings only
- IP64 rated
- EMI/RFI emissions FCC CFR Title 47 Part 15 Class A at 120/277V
- Contains no mercury or lead and RoHS compliant
- Photometric testing in accordance of IES LM-79-08
- Lumen maintenance projections in accordance of IES LM-80-08 and TM-21-11
- May be used for California Title 24 non-residential compliance, as a dimmable LED luminaire
- ENERGY STAR® certified, see Certified Light Fixtures database

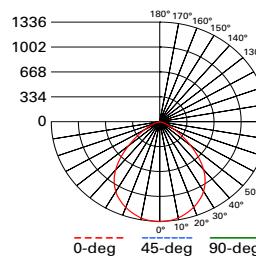

Warranty

- Five year limited warranty, consult website for details. www.cooperlighting.com/legal

Connected Solutions

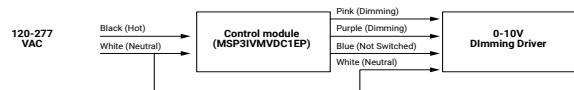

WaveLinx LITE - WTK Tilemount Sensor

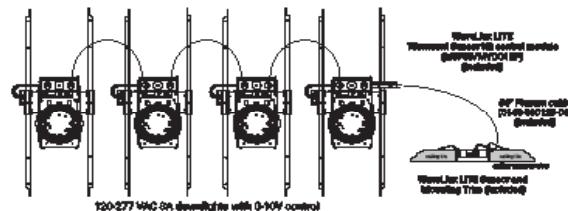

- Intuitive Android™ or Apple® iOS® app for basic system code compliant set up and configuration via Bluetooth
- Up to 28 unique areas per project site (WaveLinx LITE Bluetooth network)
- Up to 50 devices for an area, any one of 16 control zones, up to 6 occupancy sets, and custom lighting scenes
- Automatic occupancy or vacancy, sensor sensitivity, daylight dimming, etc. configurable through the app
- Refer to the WaveLinx system specifications for details

WaveLinx LITE WTK Tilemount Wiring Diagram

Includes switching (Blue load out wire) and 0-10V to each fixture controlled

WaveLinx LITE Bluetooth Enabled System

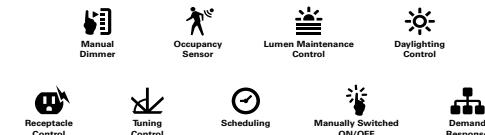

WaveLinx PRO – WTA Tilemount Sensor

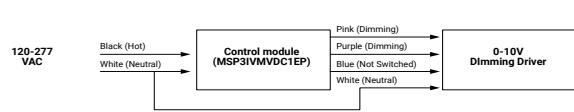

- WaveLinx PRO tilemount functionality configures zones and customizes settings from one secure mobile app
- Automatic code commissioning that meets the strictest codes
- Fixtures and sensors integrate with Wireless Area Controller, Wall Stations, and Control Devices
- Stand-Alone Offices or Entire Building Network Installations

PR6 | PR6M

Product Specifications

Frame

- Boat shaped galvanized steel plaster frame with adjustable plaster lip accommodates 1/2" to 1-1/2" thick ceilings
- May be installed in new construction; or from below the ceiling in non-accessible ceilings in remodeling (with bar hanger brackets removed)
- Provided with (2) remodel clips to secure the frame to the ceiling
- No Fuss™ mounting bars pre-installed

Universal Mounting Bracket

- Mounting bracket adjusts 2" vertically from above the ceiling or thru the aperture
- Use with No Fuss™ mounting bars (included) or with 1/2" EMT (by others)
- Removable for installation from below the ceiling in remodeling

Mounting Bars

- Captive preinstalled No Fuss™ mounting bars lock to tee grid with screwdriver or pliers
- Centering mechanism allows for consistent positioning of fixtures

LED Module

- Integrated self-flanged shallow reflector with multiple finish options
- Patented SeleCCTable™ color temperature technology and selectable lumen output for selection in the field
- Integrated dip switches for selectable color and lumen selection in the field
- Selectable CCT 3000K/3500K/4000K
- Selectable low and high lumen ranges:
 - Low Lumen: 1000lm, 1500lm, 2000lm (nominal)
 - High Lumen: 2000lm, 3000lm, 4000lm (nominal)
- Discrete (fixed) lumen models in 1000lm, 1500lm, 3000lm (nominal); use to meet lighting power density codes
- Available in 80 CRI or 90 CRI (nominal) with color accuracy within 3 SDCM
- LED array uses a plurality of mid-power surface mount LEDs delivering high flux and excellent efficiency.
- Passive cooling achieves L70 at 50,000 hours
- Integral connector for quick link to the housing flex

LED Module - Optics

- Medium / wide beam lens included
- Lens ships in medium beam. Twist-to-lock feature allows conversion to wide beam in the field without tools.
- Micro-prismatic lens is precision formed optical polymer
- Louvered Wall Wash
 - Optional field installed wall wash kit offers 360° rotation, allowing the housing to be installed in any orientation.

LED Module - Reflector

- Integrated self-flanged shallow reflector with LED array and lens
- Finish paint options: matte white, matte metallic silver, and dark bronze

LED Module - Retention

- Module/reflector is securely retained in the housing with (2) torsion springs holding the flange tightly to the ceiling

Driver

- Field replaceable constant current driver provides low noise operation
- UNV 120-277VAC 50/60Hz input standard
- Continuous 1% - 100% dimming with analog controls
- Optional "DLV" low voltage DC driver for use with DLVP distributed low voltage power system (see DLVP Design Guide / Brochure)

Emergency Option

- Available with 7W or 14W emergency battery pack with remote test switch / charge indicator light
- Provides 90 minutes of standby lighting meeting most life safety codes for egress
- Available Self-Test (self-diagnostic), with remote charge indicator and test switch
- Quick Spec emergency ordering option for quick-turn projects

Connected Lighting System

Two WaveLinx connected solutions to choose from. Refer to WaveLinx system specifications and application guides for details.

WaveLinx PRO Tilemount Sensor Kit

- WaveLinx PRO WTA tilemount sensor kit offers daylight dimming, PIR motion sensing, scene and zone configuration, automatic commissioning; and optional RLTS - Real Time Location Services available.

WaveLinx PRO Wireless Node

- WaveLinx PRO WPN wireless node provides luminaire-level control with scene and zone configuration without an integrated sensor; Connects wirelessly with daylight dimming sensor and PIR motion sensor if desired. Use with 0-10V driver only.
 - Note:** Not compatible with 347V or Chicago plenum.
 - Note:** Only available with fixed lumen housings, and not available with field selectable lumen housings.

WaveLinx LITE Tilemount Sensor Kit

- WaveLinx LITE WTK tilemount sensor kit offers daylight dimming and PIR motion sensing, scene and grouping configuration.

WaveLinx LITE Wireless Node

- WaveLinx LITE WLN wireless node provides luminaire level control with scene and zone configuration without an integrated sensor; Connects wirelessly with daylight dimming sensor and PIR motion sensor if desired. Use with 0-10V driver only.
 - Note:** Not compatible with 347V or Chicago plenum.
 - Note:** Only available with fixed lumen housings, and not available with field selectable lumen housings.

WaveLinx Tilemount Sensor Kits Application

- The WTA and WTK tilemount sensor kits include a control module mounted on the luminaire junction box via 1/2" knock-out, and a tilemount sensor on 54-inch whip; for ceiling installation by direct-mount spring clips or via mounting bracket in octagon ceiling boxes.
- The WTA and WTK tilemount sensor kits may

be ordered as factory installed on the luminaire, or ordered separately as a field installed accessory kit.

- Note:** WaveLinx PRO devices are only compatible with the WaveLinx PRO system.
- Note:** WaveLinx LITE devices are only compatible with the WaveLinx LITE system.

Junction Box

- Galvanized steel junction box
- 20in³ internal volume excluding voltage barrier
- 25 in³ internal total volume
- Voltage divider for 0-10V dimming wires [occupies (1) 1/2" pry-out space]
- Listed for (8) #12 AWG (four in, four out) 90° C conductors and feed-thru branch wiring
- (3) 1/2" and (2) 3/4" trade size pry-outs available
- (3) 4-port push wire nuts for mains voltage, with 1-port for fixture connection

Compliance

- cULus Certified to UL 1598 / C22.2 No. 250.0, suitable for damp locations and wet locations in covered ceilings only
- IP20 - Above finished ceiling; IP64 - Below finished ceiling
- Field selectable 1000/1500/2000 lm and 2000/3000/4000 lm models are Non-IC rated, insulation must be kept 3" from top and sides
- Fixed output 1000 and 1500 lm models are Type IC thermally protected and suitable for direct contact to air permeable insulation (also suitable for Non-IC)
- Not for use in direct contact with spray foam insulation, consult NEMA LSD57-2013
- Airtight per ASTM-E283-04
- Suitable for use in clothes closets when installed in accordance of the NEC 410.16 spacing requirements
- EMI/RFI emissions FCC CFR Title 47 Part 15 Class A at 120/277V
- Contains no mercury or lead and RoHS compliant
- Photometric testing in accordance of IES LM-79-08
- Lumen maintenance projections per IES LM-80-08 and TM-21-11
- Field selectable 1000/1500/2000lm and 2000/3000/4000lm models may be used for California Title 24 non-residential compliance, as a dimmable LED luminaire
- Fixed output 1000lm and 1500lm 90 CRI, Type IC models may also be used for California Title 24 Residential compliance
- ENERGY STAR® certified, see Certified Light Fixtures database

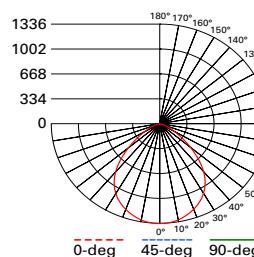

Warranty

- Five year limited warranty, consult website for details. www.cooperlighting.com/legal

Connected Solutions

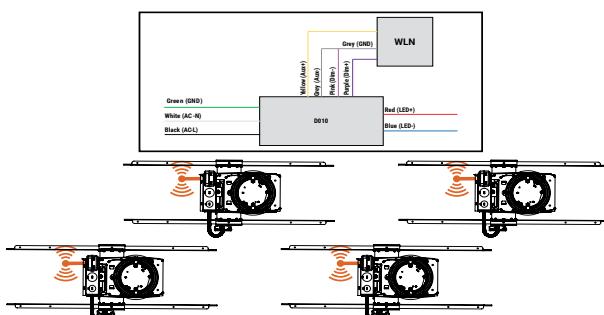

WaveLinx LITE Wireless Node - WLN

- Intuitive Android™ or Apple® iOS® app for basic system code compliant set up and configuration via Bluetooth
- Up to 28 unique areas per project site (WaveLinx LITE Bluetooth network)
- Up to 50 devices for an area, any one of 16 control zones, up to 6 occupancy sets, and custom lighting scenes
- Refer to the WaveLinx system specifications for details

WaveLinx mobile app settings

WaveLinx LITE Wireless Node (WLN) Wiring Diagram

WaveLinx LITE devices only compatible with the WaveLinx LITE system.

WaveLinx LITE Bluetooth Enabled System

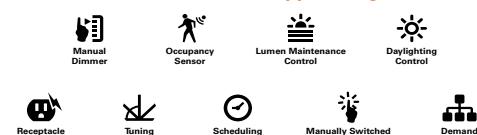

WaveLinx PRO Wireless Node - WPN

- WaveLinx Wireless functionality configures zones and customizes settings from one secure mobile app
- Automatic code commissioning that meets the strictest codes
- Fixtures and sensors integrate with WaveLinx Area Controller, Wall Stations, and Control Devices
- Stand-Alone Offices or Entire Building Network Installations

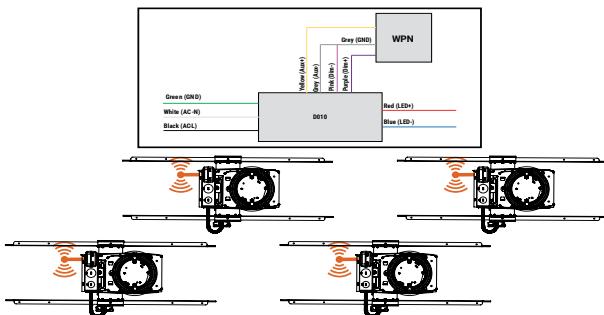

WaveLinx PRO devices only compatible with the WaveLinx PRO system.

JUNCTION BOX COMPATIBILITY

*Note: SMD 1200 lumen 120V configuration is only compatible with junction boxes 4" x 2-1/8" deep. Square junction box is required for 1200 lumen version.

TP316*
for non-metallic cable
4" x 4" x 2-1/8"
(102mm x 102mm x 54mm)

TP317*
for metal clad cable
4" x 4" x 2-1/8"
(102mm x 102mm x 54mm)

4" octagon light fixture/fan steel box*
4" x 4" x 2-1/8"
(102mm x 102mm x 54mm)

4" octagon steel box
4" x 4" x 1-1/2"
(102mm x 102mm x 38mm)

4" square deep steel box*
4" x 4" x 2-1/8"
(102mm x 102mm x 54mm)

4" square standard steel box
4" x 4" x 1-1/2"
(102mm x 102mm x 38mm)

4" round new work non-metallic light fixture/fan box
4" diameter x 2-3/16"
(102mm x 56mm)

3-1/2" round new work non-metallic ceiling box
3-1/2" diameter x 2-3/4"
(89mm x 70mm)

4" round surface mount box
4" diameter x 1-1/2"
(102mm x 38mm)
Requires SLD6RAD adapter

4" round new work non-metallic box with hanger bar assembly
4" diameter x 2-3/16" (102mm x 56mm)

This is a representative list of compatible junction boxes only. Information contained in this literature about other manufacturers' products is from published information made available by the manufacturer and is deemed to be reliable, but has not been verified. Cooper Lighting Solutions makes no specific recommendation on product selection and there are no warranties of performance or compatibility implied. Installer must determine that site conditions are suitable to allow proper installation of the mounting bracket in the box.

HALO

SMD6 SeleCCTable Series

Product Specifications

Housing

- Non-electrically conductive polycarbonate frame.
- High impact diffuse polystyrene lens provides shielding to the light guide with no pixelation
- Stamped aluminum housing provides thermal cooling achieving L70 at 50,000 hours in IC and non-IC applications

Gaskets

- Closed cell gasket achieves restrictive airflow and wet location requirements without additional caulking

Optics

- Precision acrylic light guide organizes source flux into wide distribution with 1.2 – 1.4 spacing criteria useful for general area illumination

LED

- Mid power LED array provide a uniform source with high efficiency and long life
- Available in 90 CRI minimum, R9 greater than 50 and color accuracy within 3 SDCM provide color accuracy and uniformity

Driver

SMD 120V

- Integral 120V 50/60Hz constant current driver provides noise free operation
- Continuous, flicker-free dimming from 100% to 5% with select leading or trailing edge 120V phase cut dimmers
- Dimming to 5% is best assured using dimmers with low end trim adjustment. Consult dimmer manufacturer for compatibility and conditions of use. (Note some dimmers require a neutral in the wallbox.)
- Inline electrical quick connect and E26 adapter (provided) provides mains connections

SMD 120-277V

- Integrated 120-277V 60Hz constant current driver provides noise free operation
- SMD Universal Voltage (120-277V) configurations are recommended for use with compatible 0-10V DC low voltage dimmers only

Mounting/Retention

- Adjustable spider plate allows for quick installation into both junction boxes and recessed housings
- Torsion springs and friction blades included

Electrical Junction Box Mounting

- The SMD may be used in compatible electrical junction boxes in direct contact with insulation including spray foam insulation
- Suitable for installation in many 3-1/2" and 4" square, octagon, and round electrical junction boxes
- Note:** SMD120-277V UNV is only compatible with junction boxes that provide minimum depth of 2-1/8"
- Installer must ensure compatibility of fit, wiring and proper mounting in the electrical junction box. This includes all applicable national and local electrical and building codes

Recessed Housing Mounting

Note: Use the SMDACKIT which includes torsion springs and Edison base adapter. (SOLD SEPARATELY)

- May be installed in IC recessed housings in direct contact with insulation
- Note:** Not for use in recessed housing in direct contact with spray foam insulation. Refer to NEMA LSD 57-2013

Designer Skins (Sold Separately)

- SMD skins are accessory rings in both round and square. These skins attach to the SMD for a permanent finish. Refer to the SMD accessories specification sheet for details
 - Matte White (Paintable)
 - Satin Nickel
 - Tuscan Bronze

Compliance

- cULus Certified for use with Halo housings and for use with other's housings, when used with SMDACKIT (Sold Separately) see instruction sheet for conditions of acceptability
- Wet and Damp Location listed, airtight per ASTM-E283
- Surface for use in closets, compliant with NFPA® 70, NEC® Section 410.16 (A)(3) and 410.16 (C)(5)
- EMI/RFI emissions per FCC 47CFR Part 15B
- Contains no mercury or lead and RoHS compliant.
- Photometric testing in accordance with IES LM-79-08
- Lumen maintenance projections in accordance with IES LM-80-08 and TM-21-11
- Can be used for State of California Title 24 high efficacy luminaire compliance, reference the California Energy Commission Title 20 Appliance Efficiency Database for current listings
- Can be used for International Energy Conservation Code (IECC) and high efficiency luminaire compliance
- ENERGY STAR® listed, reference database for current listings

Warranty

- Five year limited warranty, consult website for details. www.cooperlighting.com/warranty

HALO

DESCRIPTION

The Lazer Two-Conductor track is available in two finishes and 4 lengths. The overall height is only 9/16" and the track has a decorative reveal at the ceiling line. It accepts both Lazer Track lampholders and Halo Power-Trac lampholders. Lazer Track is UL listed and CSA certified.

Catalog #	Type
Project	
Comments	Date
Prepared by	

SPECIFICATION FEATURES**A. Structural**

- Extruded aluminum .050" [1.3mm] nominal wall thickness.

B. Line Conductors

- Solid copper bus bars -cross section equivalent to #12 AWG wire.

C. Insulating Liner

- Extruded polyvinyl insulator.

D. Ground Conductor

- Cross section equivalent of #12 AWG wire.

E. Neutral Conductor

- Visual polarity groove indicates proper electrical installation of lampholder adapter.

Construction

- The structural channel is extruded aluminum with .050" nominal wall thickness. Conductors are solid copper bus bars encased in rigid extruded PVC insulators. Polarized connectors and end caps are molded polycarbonate. Electrical capacity is 20 AMPS.

Size

- Miniature Trac is only 9/16" (14mm) deep by 1 3/8" (35mm) wide.

Finishes

- Miniature Trac is available in two finishes: White (P) and Matte Black, (MB).

Connectors

- Connectors simply push into the ends of the Trac, eliminating splicing. Straight, right angle, X's, T's and flexible connectors allow track to be assembled in almost any pattern.

Grounding

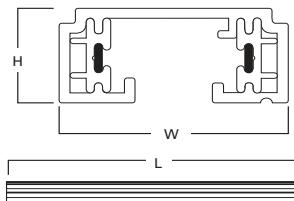

- Grounding is accomplished through a grounding channel in the track. The track maintains continuity to the building's grounding system through the ground contact fingers in each of the connectors.

Polarity

- A visual polarity line on Lazer Track indicates proper electrical installation. Simply line up polarity on Lazer Track and lampholder adapter wide.

Mounting

- Track system is recommended for ceiling mount only. For alternate mounting methods consult factory.

LZR208 - Cord and Plug Feed

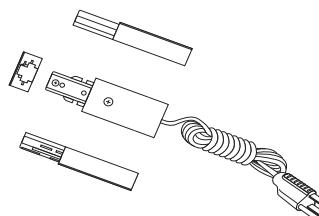

10' three-wire cord with grounded plug. Maximum capacity 5 AMPS.

Color codes: P (White), MB (Black)

ORDERING INFORMATION

SAMPLE NUMBER: LZR208P

Connector	Finish
LZR208= Cord and Plug Feed	P=White MB=Black

**LZR208****LZR211 - Flexible Connector Feed**

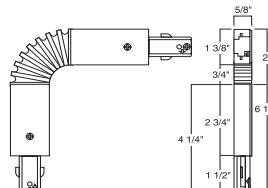

To connect two track sections at any angle up to 90° or for connecting wall and ceiling-mounted track. Can be used as electrical feed point.

Color codes: P (White), MB (Black)

ORDERING INFORMATION

SAMPLE NUMBER: LZR211P

Connector	Finish
LZR211= Flexible Connector Feed	P=White MB=Black

**LZR211****LZR212 - Mini Connector**

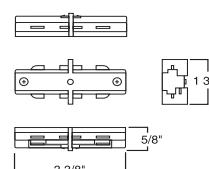

For joining two track sections end-to-end. LZR212 is not an electrical feed.

Color codes: P (White), MB (Black)

ORDERING INFORMATION

SAMPLE NUMBER: LZR212P

Connector	Finish
LZR212= Mini Connector	P=White MB=Black

**LZR212**

LZR102, LZR104, LZR106, LZR108

LZR200 - Live End Feed with Junction Box Cover

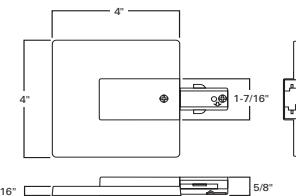

For starting a track run at beginning of track and when connector is mounted to a junction box.

Color codes: P (White), MB (Black)

ORDERING INFORMATION

SAMPLE NUMBER: LZR200P

Connector	Finish
LZR200= Live End Feed with Junction Box Cover	P=White MB=Black

**LZR200****LZR201 - Live End Feed**

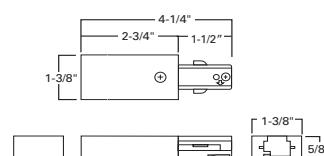

For starting a track run at beginning of track.

Color codes: P (White), MB (Black)

ORDERING INFORMATION

SAMPLE NUMBER: LZR201P

Connector	Finish
LZR201= Live End Feed	P=White MB=Black

**LZR201****LZR202 - Floating Canopy and Connector Feed**

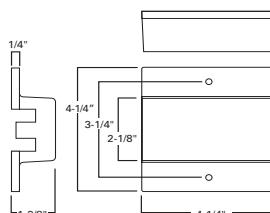

Track can be connected to existing outlet box located anywhere along the track. Comes with canopy cover, connector, dead end and mounting hardware.

Color codes: P (White), MB (Black)

ORDERING INFORMATION

SAMPLE NUMBER: LZR202P

Connector	Finish
LZR202= Floating Canopy and Connector Feed	P=White MB=Black

**LZR202****LZR203 - Adjustable "L" and Straight Connector Feed**

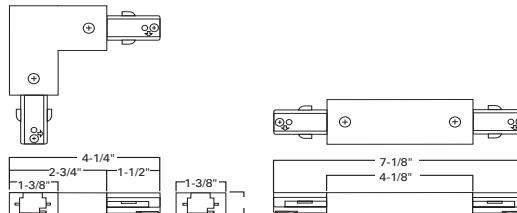

To connect two track sections at right angles or straight end-to-end. Includes straight and right angle covers. Can be used as an electrical feed.

Color codes: P (White), MB (Black)

ORDERING INFORMATION

SAMPLE NUMBER: LZR203P

Connector	Finish
LZR203= Adjustable "L" and Straight Connector Feed	P=White MB=Black

**LZR203****LZR213R "T" Connector (Right)****LZR213L "T" Connector (Left)**

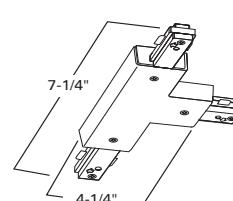

Use for joining three track sections. Select Right(R) or Left (L) Handed versions to maintain proper polarity. May be used as an electrical feed point.

Color codes: P (White), MB (Black)

ORDERING INFORMATION

SAMPLE NUMBER: LZR213RP

Connector	Finish
LZR213R= Right "T" Connector LZR213L= Left "T" Connector	P=White MB=Black

**LZR213**

LZR102, LZR104, LZR106, LZR108**LZR214 - X Connector**

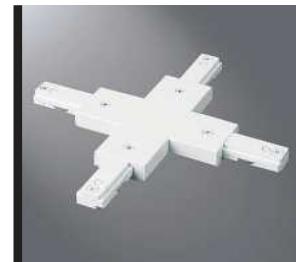

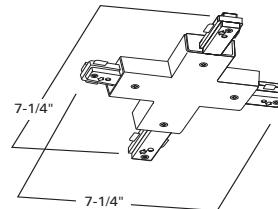

Use for joining four track sections. May be used as an electrical feed point.

Color codes: P (White), MB (Black)

ORDERING INFORMATION

SAMPLE NUMBER: LZR214P

Connector	Finish
LZR214= X Connector	P=White MB=Black

**LZR214****LZR204 - Conduit Adapter Feed**

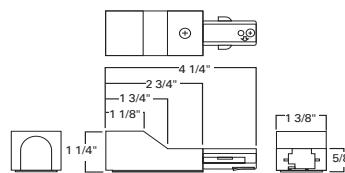

Designed to accept 1/2" trade size conduit fitting (not supplied). Use when feeding to track through surface conduit system.

Color codes: P (White), MB (Black)

ORDERING INFORMATION

SAMPLE NUMBER: LZR204P

Connector	Finish
LZR204= Conduit Adapter Feed	P=White MB=Black

**LZR204****LZR205 - Conduit Continuation Feed**

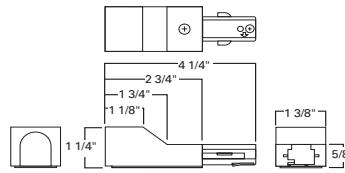

Includes one left feed and one right feed to continue a run around obstructions. Requires 1/2" trade size fitting (not included).

Color codes: P (White), MB (Black)

ORDERING INFORMATION

SAMPLE NUMBER: LZR205P

Connector	Finish
LZR205= Conduit Continuation Feed	P=White MB=Black

**LZR205****LZR206 - T-Bar Canopy Feed**

For installing track on T-Bar ceilings.

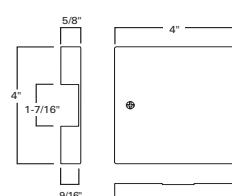

LZR201 or LZR203 also required.

Color codes: P (White)

ORDERING INFORMATION

SAMPLE NUMBER: LZR206P

Connector	Finish
LZR206= T-Bar Canopy Feed	P=White

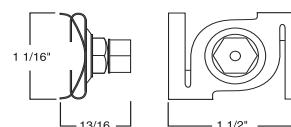

**LZR206****LZR207 - T-Bar Mounting Clip**

For installing track to a suspended ceiling. Kit contains 3 clips for mounting 2', 4', 6', or 8' track. Order one kit for each track section. Compatible with Halo and Lazer track.

ORDERING INFORMATION

SAMPLE NUMBER: LZR207

Connector	Finish
LZR207= T-Bar Mounting Clip	

**LZR207**

LZR102, LZR104, LZR106, LZR108

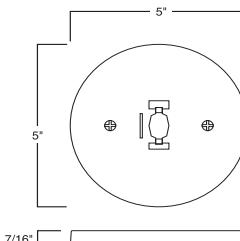

LZR209 - Monopoint Feed

For installing one Halo or Lazer track lampholder.
 Mounts directly to junction box. 500 watt maximum.
 Not compatible with Halo or Lazer low voltage
 lampholders with integral solid state power supplies.
 Color codes: P (White), MB (Black)

ORDERING INFORMATION

SAMPLE NUMBER: LZR209P

Connector	Finish
LZR209= Monopoint Feed	P=White MB=Black

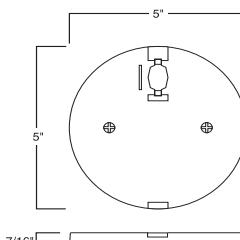

**LZR209****LZR210 - Monopoint Feed - Low Voltage**

For installing one Halo or Lazer low voltage lampholder.
 Mounts directly to junction box. 500 watt maximum.
 Color codes: P (White), MB (Black)

ORDERING INFORMATION

SAMPLE NUMBER: LZR210P

Connector	Finish
LZR210= Monopoint Feed - Low Voltage	P=White MB=Black

**LZR210**

Product Certification

Top Product Features

- 3" Aperture, 5" Length in a compact mid-stem mount cylinder
- 1600 lumen & 2500 lumen
- 90 CRI - 2700K, 3000K, 3500K, 4000K
- XBA - Xact Beam Advanced – High Performance Optics: 12 Deg, 18 Deg, 24 Deg, 30 Deg, 36 Deg
- Matte White, Matte Black, Matte Metallic Silver finishes
- Halo PowerTrac, Lazer, Halo HTEK, Juno, & Lightolier connectors

Dimensional Details

The above drawing represents the 809 with Halo L adapter. Other adapter options may be different in size and appearance.
*Note fixture to only be attached to horizontally installed track systems. Refer to ordering information for details.

Notes	Notes

Product Specifications

Aiming

- Full aiming capable.
- Can pivot 100° vertically and 340° horizontally without adjusting track position

Design

- All-metal smooth cylindrical track body
- Compact mid-stem mount
- Available in matte white, matte black, matte metallic silver finishes

Dimming

- Compatible with select leading or trailing edge phase cut dimmers at 120V only, for continuous dimming 5%-100%*
- Dimming only available with 120V configurations
- 277V option available only with Halo HTEK 277V track (L2G track connector must be used)

Compliance

- cULus Listed and UL Certified
- DLC Standard and DLC Premium**
- NSF/ANSI 2 (NSF non-food zone compliant)
- Contains no mercury or lead and RoHS compliant
- May be used for State of California Title 24 residential compliance per JA8 High Efficacy Lighting certification standards; and Title 24 Non-residential code as a dimmable LED luminaire. Refer to the CEC appliance efficiency database.
- EMI/RFI emissions per FCC 47CFR Part 15 Class B consumer limits at 120V; Class A at 277V
- Photometric testing in accordance with IES LM-79-08
- Lumen maintenance projections in accordance with IES LM-80-08 and TM-21-11

Optics & Light Engine

- XBA - Xact Beam Advanced High Performance Optics
- Spot, wide spot, narrow flood, flood, and wide flood
- 12 Deg, 18 Deg, 24 Deg, 30 Deg, 36 Deg
- Lens optics provide a high degree of collimation along the optical axis
- Low brightness in the 809 cylinder aperture limits spill light loss on cylinder wall
- Chip-on-board LED combines with XBA optic to deliver high center beam candlepower
- Matte Black Barndo Shutters provide additional cut off when used
- Lumen maintenance L70 at 50,000 hours

Electrical

- 120V/277V; Dimming at 120V only
- 277V electronic driver only available for Halo HTEK track with non-dim operation. L2G track connector must be used
- THD < 20%

Energy Data

Lumen Output	Power	Input Current
1600 lm	14.03 W	340 mA
2500 lm	22.9 W	560 mA

Warranty

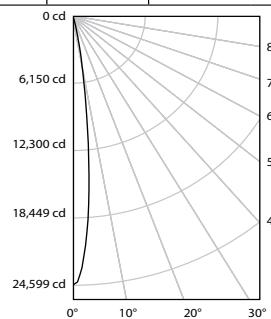

- Five year limited warranty
- Consult website for details

*Consult 809 Dimming Guide for details.

AHD355 =After Hours Dim, 8 Hours, 50% ⁹						
NOTES:						
1. DesignLight Consortium® Qualified. Refer to www.designlights.org . Qualified Products List under Family Models for details.				16. Not for use with SNO, 5MO, 5WD or RW optics. A black trim plate is used when HSS is selected.		
2. Not available with ULG option.				17. Removes additional surge module.		
3. Drop height is 500mm. Amber 500mm, which is provided at 500mA only.				18. Replace with sensor color (WH, BZ, or BK).		
4. Narrow-band 500nm +/- 5nm for wildlife and observatory use. Exact luminaire wattage available in IES files. Available with 5W, 5MQ, SL2, SL3 and SL4 distributions. Can be used with HSS option.				19. Requires PRT.		
5. 480V not with ungrounded or impedance grounded systems.				20. For WaveLinx applications, WAC Gateway required to enable field-configurability. Order WAC-PoE and WPOE-120 (10V to PoE injector) power supply if needed. Gateway not required for WaveLinx Lite Commercial (LC) applications.		
6. Not available with ISS or ISW.				21. Coastal construction finish salt spray tested to over 5,000-hours per ASTM B117, with a scribe rating of 9 per ASTM D1654.		
7. Cannot be used in conjunction with other control options.				22. Smart device with mobile application required to change system defaults. See controls section for details.		
8. Suitable for 50°C provided no options other than motion sensor are included and driver output set to 1000mA or less.				23. Only product configurations with these designated prefixes are built to be compliant with the Buy American Act of 1933 (BAA) or Trade Agreements Act of 1979 (TAA), respectively. Please refer to DOMESTIC.PREFERENCES website for more information on required components and see notes below separately analyzed under domestic preference requirements.		
9. Requires the use of photocontrol. Not available with 350mA driver current. See After Hours Dim supplemental guide for additional information.				24. For BAA or TAA requirements. Accessories sold separately will be separately analyzed under domestic preference requirements.		
10. Requires LXX with L8 (8'-8' mounting), L20 (8'-20' mounting) or L40W (21'-40' mounting.)				25. Only available for motion sensor controls, including SPB, MS/DIM, LWR or WaveLinx.		
11. The FSIR-100 configuration tool is required to adjust parameters including high and low modes, sensitivity, time delay, cutoff and more. Consult your lighting representative at Cooper Lighting Solutions for more information.				26. Not available with motion sensor controls.		
12. Includes integral photocell.				27. Specify RAL number for Custom Color. Custom color matching available upon request. Consult your lighting representative at Cooper Lighting Solutions for more information.		
13. Enlighted wireless sensors are factory installed and require network components in appropriate quantities.						
14. Battery pack operating temperature of -20°C to +40°C. Operates downlight for 90-minutes.						
15. Must specify 120V or 277V.						

Thruway Back Box

Product Specifications

Construction

- Heavy-wall, die-cast aluminum housing and removable hinged door frame
- Optional tamper-resistant fasteners offer vandal resistant access
- IK10 impact rated

Optics

- High-efficiency injection-molded AccuLED optics technology
- 15 optical distributions
- IDA Certified (3000K CCT and warmer only)

Electrical

- Standard with 0-10V dimming
- Standard with Cooper Lighting Solutions proprietary circuit module designed to withstand 10kV of transient line surge
- Suitable for operation in -40°C to 40°C ambient environments. Optional 50°C high ambient (HA) configuration
- Suitable for operation in -40°C to 40°C ambient environments. Optional 50°C high ambient (HA) configuration.

Mounting

- Utilizes "Hook-N-Lock" mounting mechanism, securing to a gasketed and zinc plated mounting attachment

- Two black oxide coated Allen set screws concealed but accessible from below

Finish

- Super durable TGIC polyester powder coat paint, 2.5 mil nominal thickness
- RAL and custom color matches available
- Coastal Construction (CC) option available

Warranty

- Five year limited warranty, consult website for details. www.cooperlighting.com/legal

* Supported by IES TM-21 standards

** Theoretical values represent estimations commonly used; however, refer to the IES position on LED Product Lifetime Prediction, IES PS-10-18, explaining proper use of IES TM-21 and LM-80.

McGraw-Edison

Impact Elite LED

Control Options

0-10V

This fixture is offered standard with 0-10V dimming driver(s).

Photocontrol (BPC and PR7)

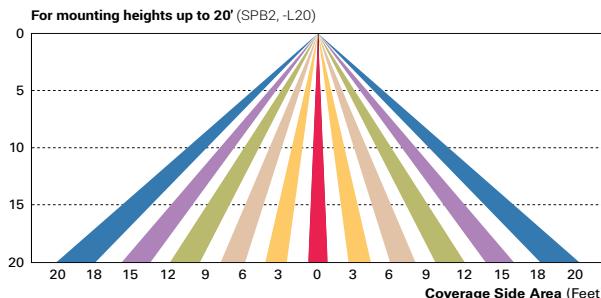

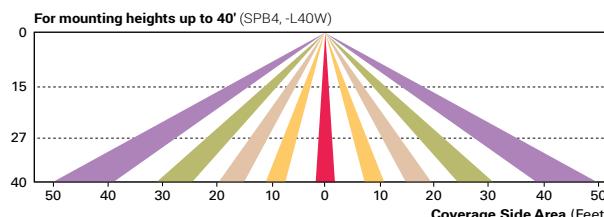

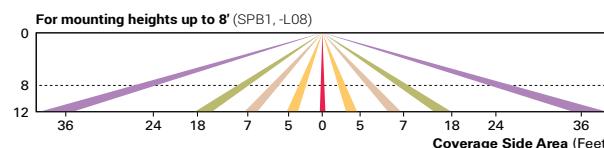

Optional button-type photocontrol provides a flexible solution to enable "dusk-to-dawn" lighting by sensing light levels.

After Hours Dim (AHD)

This feature allows photocontrol-enabled luminaires to achieve additional energy savings by dimming during scheduled portions of the night. The dimming profile will automatically take effect after a "dusk-to-dawn" period has been calculated from the photocontrol input. Specify the desired dimming profile for a simple, factory-shipped dimming solution requiring no external control wiring. Reference the After Hours Dim supplemental guide for additional information.

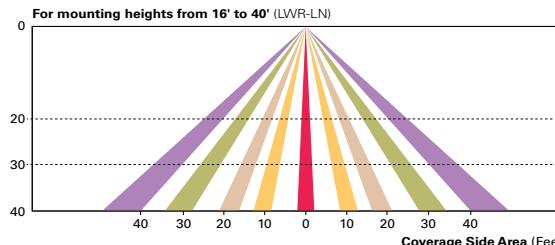

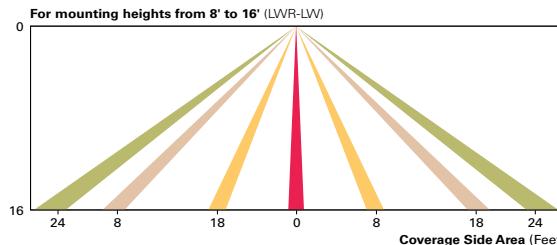

Dimming Occupancy Sensor (SPB, MS/DIM-LXX)

These sensors are factory installed in the luminaire housing. When the SPB or MS/DIM sensor options are selected, the occupancy sensor is connected to a dimming driver and the entire luminaire dims when there is no activity detected. When activity is detected, the luminaire returns to full light output. The MS/DIM sensor is factory preset to dim down to approximately 50 percent power with a time delay of five minutes. SPB motion sensors require the Sensor Configuration mobile application by Wattstopper to change factory default dimming level, time delay, sensitivity and other parameters. Available for iOS and Android devices. The SPB sensor is factory preset to dim down to approximately 10% power with a time delay of five minutes. The MS/DIM occupancy sensors require the FSIR-100 programming tool to adjust factory defaults.

Enlighted Wireless Control and Monitoring System (LWR-LW and LWR-LN)

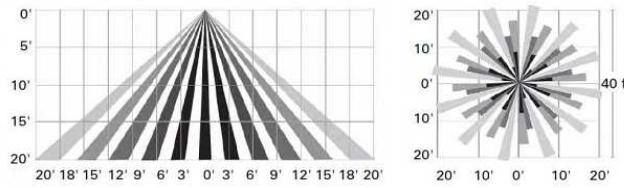

Enlighted is a connected lighting solution that combines a broad selection of energy-efficient LED luminaires with a powerful integrated wireless sensor system. The sensor controls the lighting system in compliance with the latest energy codes and collects valuable data about building performance and use. Software applications turn the granular data into information through energy dashboards and specialized apps that make it simple and help optimize the use of building resources, beyond lighting.

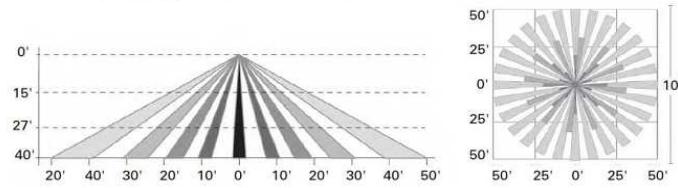

WaveLinx Wireless Control and Monitoring System

Operates on a wireless mesh network based on IEEE 802.15.4 standards enabling wireless control of outdoor lighting. WaveLinx Pro (WPS2 to WPS4) outdoor wireless sensors offer passive infrared (PIR) occupancy and photocell for closed loop daylight harvesting, and can be factory or field-installed. Sensors are factory preset to dim down to 50% after 15 minutes of no motion detected. Two lens options are available for mounting heights of 7' to 40'. Use the WaveLinx mobile application for set-up and configuration. At least one Wireless Area Controller (WAC) is required for full functionality and remote communication (including adjustment of any factory pre-sets). WaveLinx Lite (WLS4 and WLS2) outdoor wireless sensors provide PIR occupancy and photocell for closed loop daylight harvesting, and can be factory or field-installed. Sensors are factory preset to dim down to 50% after 15 minutes of no motion detected. Two lens options are available for mounting heights of 7' to 40'. Use the WaveLinx Lite mobile application for set-up and configuration. WAC not required. WaveLinx Outdoor Control Module (WOLC-7P-10A) accessory provides a photocontrol enabling astronomic or time-based schedules to provide ON, OFF and dimming control of fixtures utilizing a 7-PIN receptacle. The out-of-box functionality is ON at dusk and OFF at dawn.

For mounting heights up to 15' (WPS2 and WLS2)

For mounting heights up to 40' (WPS4 and WLS4)

NOTES:						
1. DesignLight Consortium® Qualified. Refer to www.designlights.org . Qualified Products List under Family Models for details.				16. Not for use with SNO, 5MO, 5W0 or RW optics. A black trim plate is used when HSS is selected.		
2. Not available with ULG option.				17. Removes additional surge module.		
3. Dropout voltage is 120V at 500mA, which is provided at 500mA only.				18. Replace with sensor color (WH, BZ, or BK).		
4. Narrow-band 500nm +/- 5nm for wildlife and observatory use. Exact luminaire wattage available in IES files. Available with 5W, 5MO, SL2, SL3 and SL4 distributions. Can be used with HSS option.				19. Requires PRT.		
5. 480V not available with ungrounded or impedance grounded systems.				20. For WaveLinx applications, WAC Gateway required to enable field-configurability. Order WAC-PoE and WPOE-120 (10V to PoE injector) power supply if needed. Gateway not required for WaveLinx Lite Commercial (LC) applications.		
6. Not available with ISS or ISW.				21. Coastal construction finish salt spray tested to over 5,000-hours per ASTM B117, with a scribe rating of 9 per ASTM D1654.		
7. Cannot be used in conjunction with other control options.				22. Smart device with mobile application required to change system defaults. See controls section for details.		
8. Suitable for 50°C provided no options other than motion sensor are included and driver output set to 1000mA or less.				23. Only product configurations with these designated prefixes are built to be compliant with the Buy American Act of 1933 (BAA) or Trade Agreements Act of 1979 (TAA), respectively. Please refer to DOMESTIC.PREFERENCES website for more information on required and selected components.		
9. Requires the use of photocontrol. Not available with 350mA driver current. See After Hours Dim supplemental guide for additional information.				Components and selected software will be separately analyzed under domestic preference requirements.		
10. Requires LWX with L08 (<8' mounting), L20 (8'-20' mounting) or L40W (21'-40' mounting.)				24. For BAA or TAA requirements. Accessories sold separately will be separately analyzed under domestic preference requirements.		
11. The FSIR-100 configuration tool is required to adjust parameters including high and low modes, sensitivity, time delay, cutoff and more. Consult your lighting representative at Cooper Lighting Solutions for more information.				25. Only available in 3000K, 4000K or 5000K CCT.		
12. Includes integral photocell.				26. Not available with motion sensor controls, including SPB, MS/DIM, LWR or WaveLinx.		
13. Enlighted wireless sensors are factory installed and require network components in appropriate quantities.				27. Specify RAL number for Custom Color. Custom color matching available upon request. Consult your lighting representative at Cooper Lighting Solutions for more information.		
14. Battery pack operating temperature of -20°C to +40°C. Operates downlight for 90-minutes.						
15. Must specify 120V or 277V.						

Thruway Back Box

Product Specifications

Construction

- Heavy-wall, die-cast aluminum housing and removable hinged door frame
- Optional tamper-resistant fasteners offer vandal resistant access
- IK10 impact rated

Optics

- High-efficiency injection-molded AccuLED optics technology
- 15 optical distributions
- IDA Certified (3000K CCT and warmer only)

Electrical

- Standard with 0-10V dimming
- Standard with Cooper Lighting Solutions proprietary circuit module designed to withstand 10kV of transient line surge
- Suitable for operation in -40°C to 40°C ambient environments. Optional 50°C high ambient (HA) configuration
- Suitable for operation in -40°C to 40°C ambient environments. Optional 50°C high ambient (HA) configuration.

Mounting

- Utilizes "Hook-N-Lock" mounting mechanism, securing to a gasketed and zinc plated mounting attachment

- Two black oxide coated Allen set screws concealed but accessible from below

Finish

- Super durable TGIC polyester powder coat paint, 2.5 mil nominal thickness
- RAL and custom color matches available
- Coastal Construction (CC) option available

Warranty

- Five year limited warranty, consult website for details. www.cooperlighting.com/legal

McGraw-Edison

Impact Elite LED

Control Options

0-10V

This fixture is offered standard with 0-10V dimming driver(s).

Photocontrol (BPC and PR7)

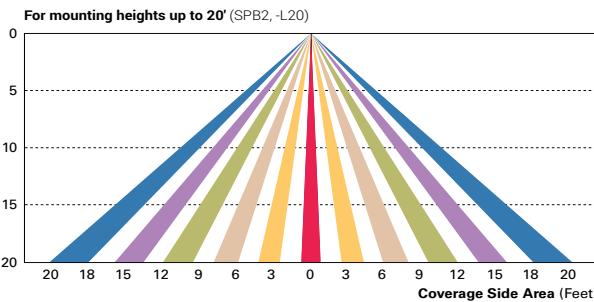

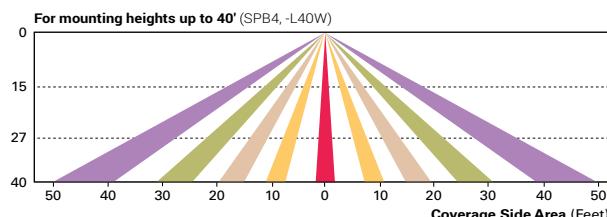

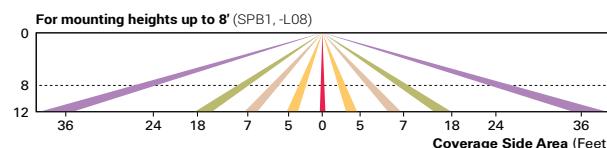

Optional button-type photocontrol provides a flexible solution to enable "dusk-to-dawn" lighting by sensing light levels.

After Hours Dim (AHD)

This feature allows photocontrol-enabled luminaires to achieve additional energy savings by dimming during scheduled portions of the night. The dimming profile will automatically take effect after a "dusk-to-dawn" period has been calculated from the photocontrol input. Specify the desired dimming profile for a simple, factory-shipped dimming solution requiring no external control wiring. Reference the After Hours Dim supplemental guide for additional information.

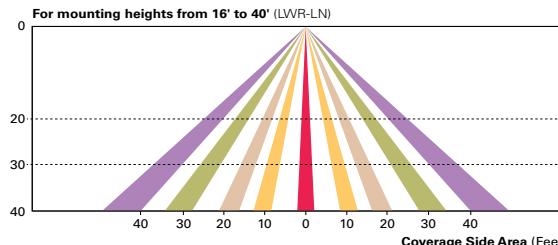

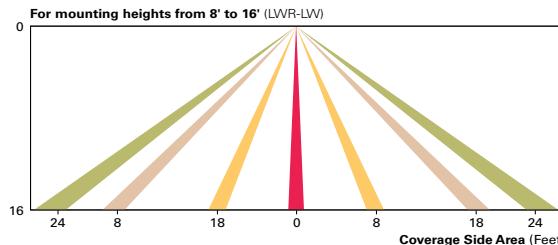

Dimming Occupancy Sensor (SPB, MS/DIM-LXX)

These sensors are factory installed in the luminaire housing. When the SPB or MS/DIM sensor options are selected, the occupancy sensor is connected to a dimming driver and the entire luminaire dims when there is no activity detected. When activity is detected, the luminaire returns to full light output. The MS/DIM sensor is factory preset to dim down to approximately 50 percent power with a time delay of five minutes. SPB motion sensors require the Sensor Configuration mobile application by Wattstopper to change factory default dimming level, time delay, sensitivity and other parameters. Available for iOS and Android devices. The SPB sensor is factory preset to dim down to approximately 10% power with a time delay of five minutes. The MS/DIM occupancy sensors require the FSIR-100 programming tool to adjust factory defaults.

Enlighted Wireless Control and Monitoring System (LWR-LW and LWR-LN)

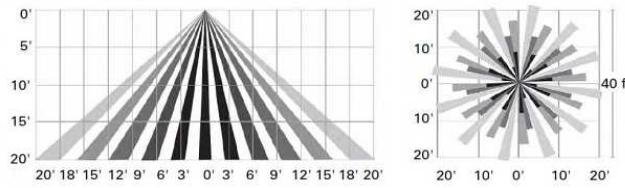

Enlighted is a connected lighting solution that combines a broad selection of energy-efficient LED luminaires with a powerful integrated wireless sensor system. The sensor controls the lighting system in compliance with the latest energy codes and collects valuable data about building performance and use. Software applications turn the granular data into information through energy dashboards and specialized apps that make it simple and help optimize the use of building resources, beyond lighting.

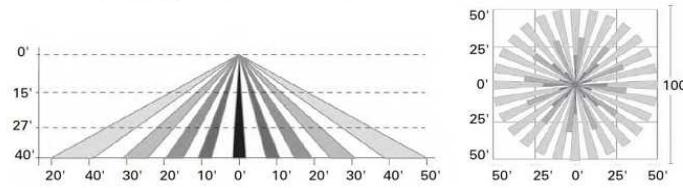

WaveLinx Wireless Control and Monitoring System

Operates on a wireless mesh network based on IEEE 802.15.4 standards enabling wireless control of outdoor lighting. WaveLinx Pro (WPS2 to WPS4) outdoor wireless sensors offer passive infrared (PIR) occupancy and photocell for closed loop daylight harvesting, and can be factory or field-installed. Sensors are factory preset to dim down to 50% after 15 minutes of no motion detected. Two lens options are available for mounting heights of 7' to 40'. Use the WaveLinx mobile application for set-up and configuration. At least one Wireless Area Controller (WAC) is required for full functionality and remote communication (including adjustment of any factory pre-sets). WaveLinx Lite (WLS4 and WLS2) outdoor wireless sensors provide PIR occupancy and photocell for closed loop daylight harvesting, and can be factory or field-installed. Sensors are factory preset to dim down to 50% after 15 minutes of no motion detected. Two lens options are available for mounting heights of 7' to 40'. Use the WaveLinx Lite mobile application for set-up and configuration. WAC not required. WaveLinx Outdoor Control Module (WOLC-7P-10A) accessory provides a photocontrol enabling astronomic or time-based schedules to provide ON, OFF and dimming control of fixtures utilizing a 7-PIN receptacle. The out-of-box functionality is ON at dusk and OFF at dawn.

For mounting heights up to 15' (WPS2 and WLS2)

For mounting heights up to 40' (WPS4 and WLS4)

Product Features

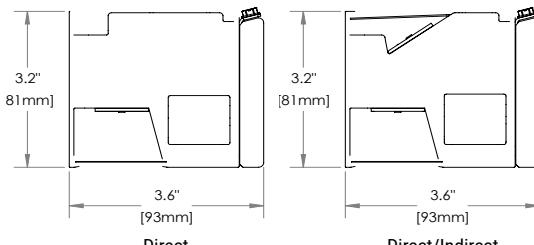

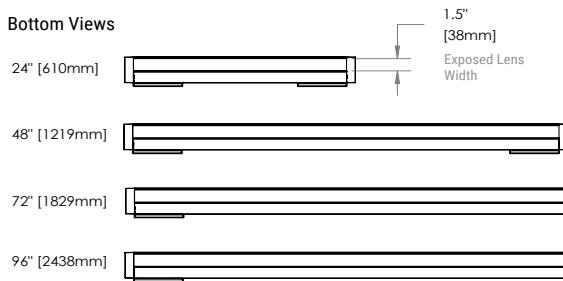

Top Product Features

- Compact scale and seamless illumination with single piece luminous roll lens up to 100 feet
- ADA Compliant for wall mount installation
- High quality illumination while delivering up to 138 lumens per watt
- Wide range of direct/indirect distributions plus independent up/down circuiting
- Available in 2', 4', 6', 8', and Continuous runs
- Options to meet Buy American Act requirements

Notes Only product configurations with this designated prefix are built to be compliant with the Buy American Act of 1933 (BAA). Please refer to DOMESTIC PREFERENCES website for more information. Components shipped separately may be separately analyzed under domestic preference requirements.	Notes Single piece lens supplied up to 100-ft.	Notes Custom lumen output available. Up (Indirect): Min = 170 Lms/ft Max = 1800 Lms/ft Consult factory to specify custom lumen package.	Notes Custom lumen output available. Down (Direct): Min = 135 Lms/ft Max = 2000 Lms/ft Consult factory to specify custom lumen package.	Notes White Tuning is 90CRI standard. Tunable White options to be used with W2A driver only. Must be used with two (2) 10V dimming control channels, 1 color, 1 intensity. Not compatible with other control or sensor options.	Notes Refers to wiring in cross section. Dual circuit not available with secondary circuit or integrated sensor.	Notes Select "D" wiring for individual fixtures. Emergency and Secondary circuit section wiring are configured per unit (2ft, 4ft, 6ft, or 8ft). Emergency circuit powers downlight portion only. Emergency circuit not available with secondary circuit or integrated sensor. Secondary circuit not available with integrated sensor.	Notes Integral 347V driver with STD 0-10V option only.	

Driver / Dimming	Integral Sensor Options	Integral Emergency Device Options	Finish	Mounting	Run Length
Driver / Dimming	Integral Sensor Options	Integral Emergency Device Options	Finish	Mounting	Run Length

Notes Not all driver options are available for every configuration. See Driver Availability tables for more details.	Notes WAA and WAB sensor must be used with "STD" driver. LWI sensor must be used with "SLT" sensor ready driver. Integrated Sensor with Emergency circuit "E" requires the EPC option. SWPD1 has been renamed to WAA, but remains the same sensor.	Notes Battery powers 4ft section downlight only during loss of power Battery not available with Sensor in 4ft unit size. Battery is not available in 2ft fixture unit size. EPC option used to bypass local control during outage. Must be used in conjunction with UL 1008 device (provided by others).	Notes CC = must denote RAL color number		Notes See 'Standard Row Configurations' table on Page 3 for continuous row length breakdowns. 2ft not available with integrated sensors or emergency.

Corelite

Continua SQ Wall - SQW

Product Specifications

Construction

- Single-piece extruded aluminum housing
- 3.2" x 3.2" profile with 1/2" wall mounting bracket.
- Die-formed 20 gauge cold rolled steel LED tray
- Driver accessible from above

End Caps

- Die cast aluminum end caps allow for expansion of lens to eliminate light leak
- Attach mechanically to the end of the fixture without exposed fasteners
- End cap adds 1" at each end

Lengths

- Available in 2 ft, 4 ft, 6 ft, and 8ft sections
- Modular design eliminates the need for starter, intermediate, and end of run sections
- See table on page 4 for continuous row length breakdowns

Finish

- Electrostatically applied polyester powder coat paint
- White, Silver, or Black finish offered as standard
- RAL custom colors are available

Mounting

- Fixture mounts directly to structure over a 2 x 4 inch standard electrical box mounted horizontally into the wall
- Wall bracket design allows fixture to hang while wiring connections are made
- Power feed location located on left side of each unit

- All sections are continuously wired with push-in connectors for fast installation
- Fixtures can be joined for straight continuous runs using rigid alignment feature

Shielding / Optics

- Frosted continuous flexible roll lens creates seamless illumination along entire row length
- Single piece roll lens up to 100 ft
- Dust cover present in all configurations to soften beam edge and provide easy wipe-down maintenance

LED and Light Engine

- LEDs are available in 3000K, 3500K, 4000K
- CRI options of either ≥ 80 CRI or ≥ 90 CRI
- Lumen output will be affected - please refer to the lumen adjustment factor tables
- TM21 life at 60,000 hours up to L84 and calculated L70 exceeds 121,000 hrs
- Drivers available in universal 120-277V and 347V
- White Tuning options available with Cooper Lighting's VividTune

Integrated Controls

- 0-10V dimming to 1% standard
- WaveLinx sensor compatible for IoT capability
- Enlighted sensor compatible for IoT capability
- DALI 2.0 and Lutron dimming available
- WaveLinx Lite compatible for out-of-the-box functionality

Emergency Options

- Emergency circuit option operates entire downlight portion of a specified unit (4 ft, 6 ft, or 8 ft)
- Optional 6-watt 120-277V integral emergency battery illuminates a 4 ft. down-light section
- 90-minute backup period for code compliance
- Test switch/indicator button located on the bottom side of the luminaire
- For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 6 = 600 lumens)
- Battery is self-testing
- UL 924 emergency/generator transfer options available

Weight

- <3 lbs. per foot

Compliance

- cULus listed for damp locations
- RoHS compliant
- ADA compliant for wall mount installation
- Tested to IESNA LM-79 and LM-80
- Stated life per TM21 standards
- Can be used for State of California Title 24 high efficacy luminaire

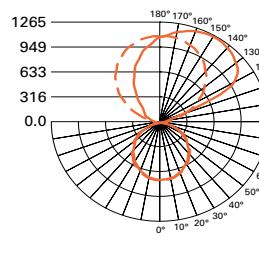

Warranty

- Five year warranty standard
www.cooperlighting.com/legal

Product Features

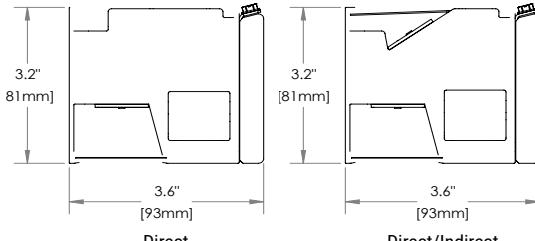

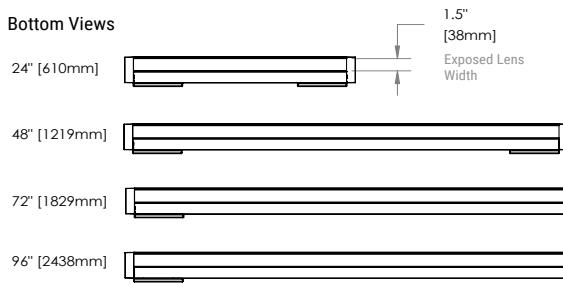

Top Product Features

- Compact scale and seamless illumination with single piece luminous roll lens up to 100 feet
- ADA Compliant for wall mount installation
- High quality illumination while delivering up to 138 lumens per watt
- Wide range of direct/indirect distributions plus independent up/down circuiting
- Available in 2', 4', 6', 8', and Continuous runs
- Options to meet Buy American Act requirements

Up/Down Circuits)	D=None (Default Dimming) E=Emergency Circuit S=Secondary Circuit	UNV=Universal (120V-277V) 347=347V
Notes Only product configurations with this designated prefix are built to be compliant with the Buy American Act of 1933 (BAA). Please refer to DOMESTIC PREFERENCES website for more information. Components shipped separately may be separately analyzed under domestic preference requirements.	Notes Single piece lens supplied up to 100-ft.	Notes Custom lumen output available. Up (Indirect): Min = 170 Lms/ft Max = 1800 Lms/ft Consult factory to specify custom lumen package.	Notes Custom lumen output available. Down (Direct): Min = 135 Lms/ft Max = 2000 Lms/ft Consult factory to specify custom lumen package.	Notes White Tuning is 90CRI standard. Tunable White options to be used with W2A driver only. Must be used with W2A driver only. Must be used with two (2) 10V dimming control channels, 1 color, 1 intensity. Not compatible with other control or sensor options.	Notes Refers to wiring in cross section. Dual circuit not available with secondary circuit or integrated sensor.	Notes Select "D" wiring for individual fixtures. Emergency and Secondary circuit section wiring are configured per unit (2ft, 4ft, 6ft, or 8ft). Emergency circuit powers downlight portion only. Emergency circuit not available with secondary circuit or integrated sensor. Secondary circuit not available with integrated sensor.	Notes Integral 347V driver with STD 0-10V option only.

Notes Not all driver options are available for every configuration. See Driver Availability tables for more details.	Notes WAA and WAB sensor must be used with "STD" driver. LWI sensor must be used with "SLT" sensor ready driver. Integrated Sensor with Emergency circuit "E" requires the EPC option. SWPD1 has been renamed to WAA, but remains the same sensor.	Notes Battery powers 4ft section downlight only during loss of power Battery not available with Sensor in 4ft unit size. Battery is not available in 2ft fixture unit size. EPC option used to bypass local control during outage. Must be used in conjunction with UL 1008 device (provided by others).	Notes CC = must denote RAL color number		Notes See 'Standard Row Configurations' table on Page 3 for continuous row length breakdowns. 2ft not available with integrated sensors or emergency.

Corelite

Continua SQ Wall - SQW

Product Specifications

Construction

- Single-piece extruded aluminum housing
- 3.2" x 3.2" profile with 1/2" wall mounting bracket.
- Die-formed 20 gauge cold rolled steel LED tray
- Driver accessible from above

End Caps

- Die cast aluminum end caps allow for expansion of lens to eliminate light leak
- Attach mechanically to the end of the fixture without exposed fasteners
- End cap adds 1" at each end

Lengths

- Available in 2 ft, 4 ft, 6 ft, and 8ft sections
- Modular design eliminates the need for starter, intermediate, and end of run sections
- See table on page 4 for continuous row length breakdowns

Finish

- Electrostatically applied polyester powder coat paint
- White, Silver, or Black finish offered as standard
- RAL custom colors are available

Mounting

- Fixture mounts directly to structure over a 2 x 4 inch standard electrical box mounted horizontally into the wall
- Wall bracket design allows fixture to hang while wiring connections are made
- Power feed location located on left side of each unit

- All sections are continuously wired with push-in connectors for fast installation
- Fixtures can be joined for straight continuous runs using rigid alignment feature

Shielding / Optics

- Frosted continuous flexible roll lens creates seamless illumination along entire row length
- Single piece roll lens up to 100 ft
- Dust cover present in all configurations to soften beam edge and provide easy wipe-down maintenance

LED and Light Engine

- LEDs are available in 3000K, 3500K, 4000K
- CRI options of either ≥ 80 CRI or ≥ 90 CRI
- Lumen output will be affected - please refer to the lumen adjustment factor tables
- TM21 life at 60,000 hours up to L84 and calculated L70 exceeds 121,000 hrs
- Drivers available in universal 120-277V and 347V
- White Tuning options available with Cooper Lighting's VividTune

Integrated Controls

- 0-10V dimming to 1% standard
- WaveLinx sensor compatible for IoT capability
- Enlighted sensor compatible for IoT capability
- DALI 2.0 and Lutron dimming available
- WaveLinx Lite compatible for out-of-the-box functionality

Emergency Options

- Emergency circuit option operates entire downlight portion of a specified unit (4 ft, 6 ft, or 8 ft)
- Optional 6-watt 120-277V integral emergency battery illuminates a 4 ft. down-light section
- 90-minute backup period for code compliance
- Test switch/indicator button located on the bottom side of the luminaire
- For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 6 = 600 lumens)
- Battery is self-testing
- UL 924 emergency/generator transfer options available

Weight

- <3 lbs. per foot

Compliance

- cULus listed for damp locations
- RoHS compliant
- ADA compliant for wall mount installation
- Tested to IESNA LM-79 and LM-80
- Stated life per TM21 standards
- Can be used for State of California Title 24 high efficacy luminaire

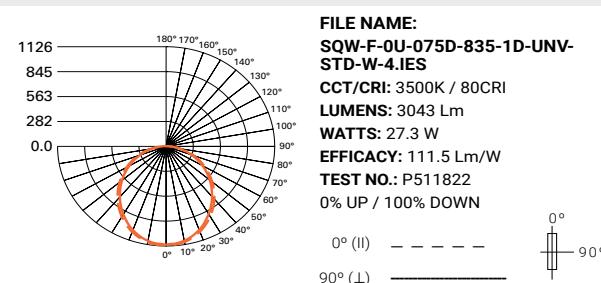

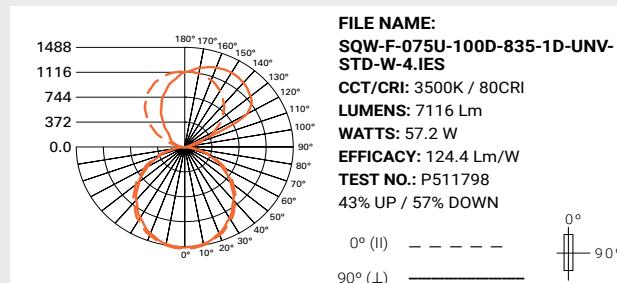

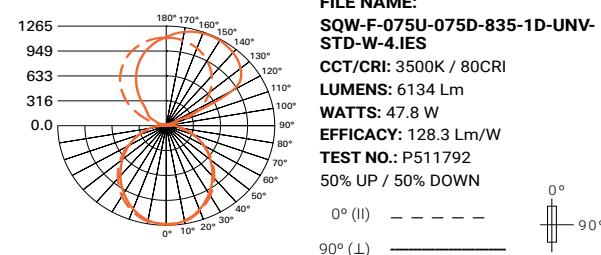

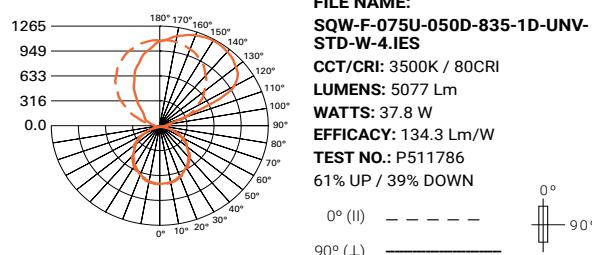

Warranty

- Five year warranty standard
www.cooperlighting.com/legal

SLSTP Lensed LED

Lensed LED Striplight

Typical Applications

Commercial • Industrial • Retail • Residential

Interactive Menu

- Order Information page 2
- Photometric Data page 3
- Control Solutions page 4
- Product Warranty

Top Product Features

- From 2800 to 6200 lumens for a 4 foot strip
- 8ft. 4ft. and 2ft. Lengths with single lens (no tandem) to address any application
- Up to 125 LPW and DLC compliant to enable rebates and energy savings
- Frost white polycarbonate lens, linear prisms for even illumination
- 4000K and 5000K CCT, 80 CRI Min

Product Certification

Product Features

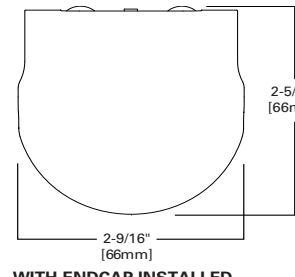

J-box Cover and Endcap included

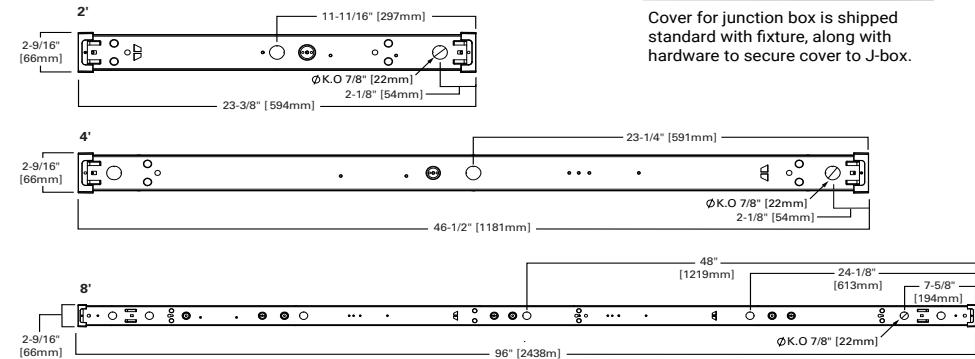

Cover for junction box is shipped standard with fixture, along with hardware to secure cover to J-box.

Dimensional and Mounting Details

WITH ENDCAP INSTALLED

Metalux**SLSTP Lensed****Product Specifications****Feature Header**

- Fixture channel, cover and end plates are formed from cold rolled steel
- Fixture channel offers all of the features needed for installation including multiple K0, a round J-box cover, wiring connectors and decorative end caps
- Post painted for ease of handling
- Decorative end caps snap-on for an improved aesthetic finish
- Suitable for either single or continuous row applications

Electrical

- Long-Life LED system with an energy-efficient electronic driver comes in UNV (120-277V) or 120V versions
- Both drivers offer smooth dimming with a number of residential and commercial dimmers
- LED's CCT are 3500K and 4000K with a CRI \geq 80
- Projected life is 50,000 hours at 70% lumen output

Controls

- Standard 0-10V continuous dimming driver works with any standard 0-10V control/dimmer
- Dimming range is 10% to 100% and varies by control device
- 120V drivers work with standard 120V phase cut dimmers

Finish

- Post painted with high reflective paint – standard

Shielding

- Offers a frost lens with decorative end caps for single and end of the row applications

Installation

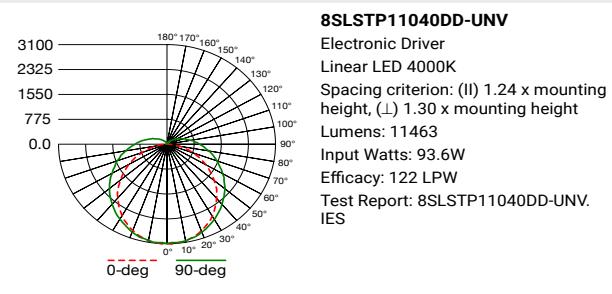

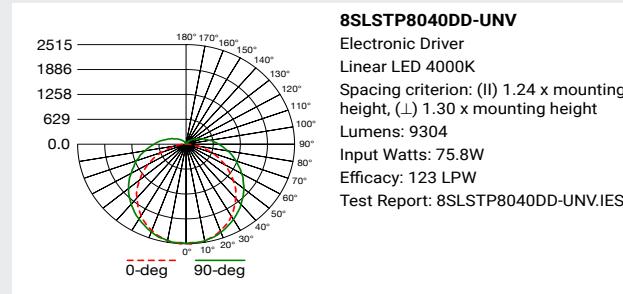

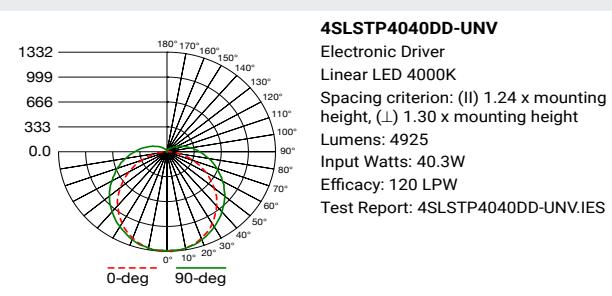

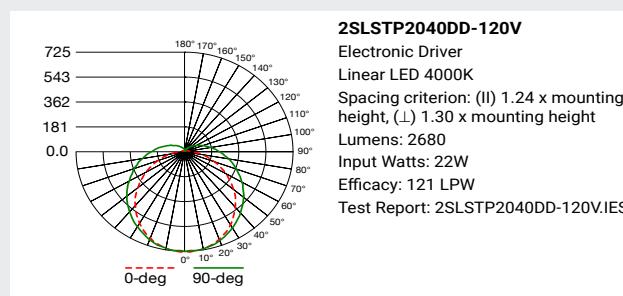

- May be surface, suspended, or wall mounted
- Multiple 7/8" K.O. on back and one on each end

Compliance

- cULus listed for damp location rated
- LED's comply with IESNA LM-79 and LM-80 standards
- Under 4", ADA Compliant. DesignLights Consortium® Qualified and classified for DLC Standard, refer to www.designlights.org for details
- RoHS compliant
- Suitable for use in closet storage spaces when installed in accordance with NFPA-70 and NEC 410.16 spacing requirements

Warranty

- Five year limited warranty

SPECIFICATION GUIDE

BIOS TECHNOLOGY

Choosing Your BIOS Solution

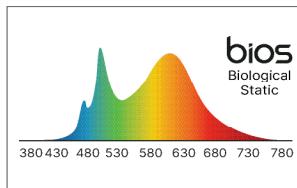

To learn more about BIOS Technology, please click or scan the QR Code.

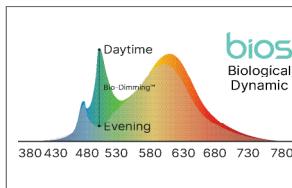

BIOS is offered in four Circadian LED Solutions with BIOS SkyBlue Technology — Biological Static, Biological Dynamic, Biological Tunable, and Biological Dim-to-Warm. BIOS SkyBlue™ Technology includes a blue peak at 490nm that provides an effective daytime circadian signal using standard architectural color temperatures.

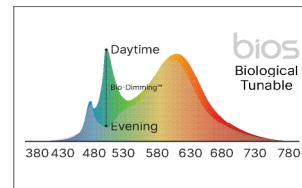

BIOS Static

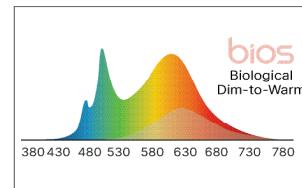

BIOS Dynamic

BIOS Tunable

BIOS Dim-to-Warm

Daytime

No color change when dimmed

Daytime & Evening

500K shift when dimmed

Daytime & Evening

Dims to 2700K

Daytime & Evening

Dims from cool to warm

Spaces that operate during daytime hours — 7am and 7pm

Spaces that operate overnight — after 7pm and before 7am

Spaces that operate with overnight shifts — after 7pm and before 7am

Spaces where people sleep — after 7pm and before 7am

Circadian and Human Centric Light

SPECIFICATION GUIDE

SMARTBEAM® TECHNOLOGY

The Ultimate Control of Lighting Distributions

SmartBeam makes it easy to specify the exact light required for any architectural space. Available in every XICO product; it is now possible to create truly tailored and engaging lighting that transform spaces, improves visual comfort, and saves energy.

To learn more about our SmartBeam Technology, please click or scan the QR Code.

Fixture Power & Controls

Voltage

LED Driver Factory Selected, 36–39V Constant Current

Emergency Backup

Backup Types Emergency Circuit, Emergency Battery Onboard or Remote, and other emergency backups are available

Wiring Typically the Emergency Backup is wired to 48" sections

Power 10 W

Illumination Time 90 minutes

SPECIFICATION GUIDE

Declare.

Declare Listed

Declare labels provide a quick and reliable way to make choices about the environmental footprint and safety of the product. Declare is internationally recognized and the labels can be found on the product, product packaging, or company website. Visit xicoled.com for Declare Listed details.

Red List Free

An industry standard certification for LED lighting products based on the International Living Future Institute (ILFI). These products only use materials based on the "Red List of Toxic Chemicals" (a list of chemicals and materials known to be hazardous to people and/or the Earth) that are safe, healthy, and environmentally sustainable.

Certifications

Compliance

BAA & TAA compliant in-house manufacturing in Boston, MA with North American supply chain

Sustainability

Declare Listed and Red List Free

Packaging

Low carbon, environmentally conscious packaging and shipping methods

Environmental Suitability

IP Rating

Suitable for Dry and Damp Locations, indoor use only

Recyclable

SmartOptics and all powder coated and anodized parts are fully recyclable at end of life

Reliability

Manufacturing

All XICO products and associated optics and LED engines are assembled at our factory in Woburn, MA

Quality Assurance

Each product is engineered reliability and quality assurance tested

Warranty & Terms

5-YR Warranty

Business Terms

For details on our warranty and business terms, please click or scan the QR Code.

Product Features

Top Product Features

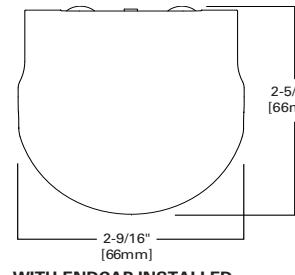

- From 2800 to 6200 lumens for a 4 foot strip
- 8ft. 4ft. and 2ft. Lengths with single lens (no tandem) to address any application
- Up to 125 LPW and DLC compliant to enable rebates and energy savings
- Frost white polycarbonate lens, linear prisms for even illumination
- 4000K and 5000K CCT, 80 CRI Min

J-box Cover and Endcap included

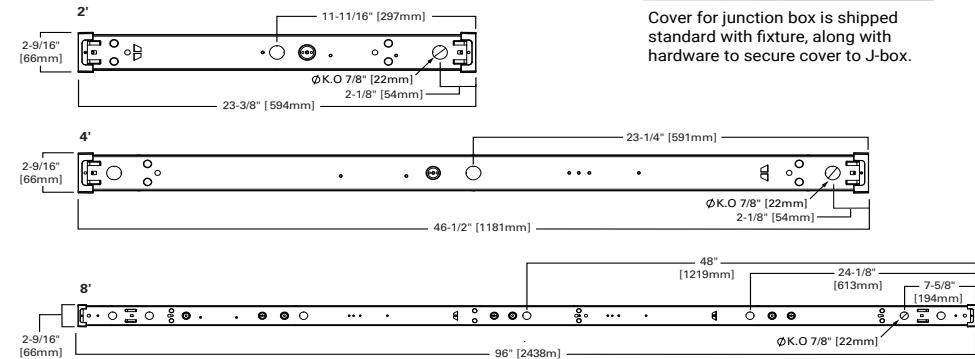

Cover for junction box is shipped standard with fixture, along with hardware to secure cover to J-box.

Metalux**SLSTP Lensed****Product Specifications****Feature Header**

- Fixture channel, cover and end plates are formed from cold rolled steel
- Fixture channel offers all of the features needed for installation including multiple K0, a round J-box cover, wiring connectors and decorative end caps
- Post painted for ease of handling
- Decorative end caps snap-on for an improved aesthetic finish
- Suitable for either single or continuous row applications

Electrical

- Long-Life LED system with an energy-efficient electronic driver comes in UNV (120-277V) or 120V versions
- Both drivers offer smooth dimming with a number of residential and commercial dimmers
- LED's CCT are 3500K and 4000K with a CRI \geq 80
- Projected life is 50,000 hours at 70% lumen output

Controls

- Standard 0-10V continuous dimming driver works with any standard 0-10V control/dimmer
- Dimming range is 10% to 100% and varies by control device
- 120V drivers work with standard 120V phase cut dimmers

Finish

- Post painted with high reflective paint – standard

Shielding

- Offers a frost lens with decorative end caps for single and end of the row applications

Installation

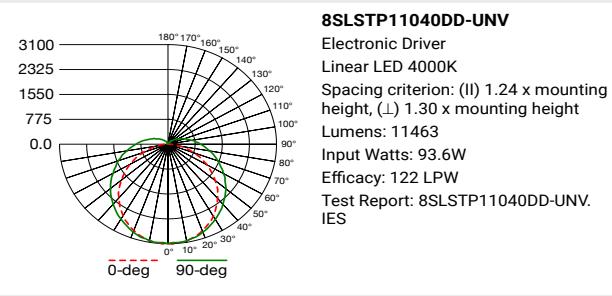

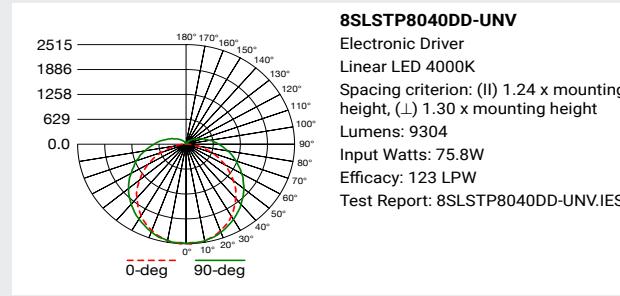

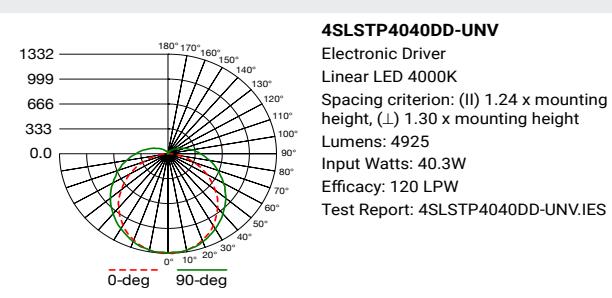

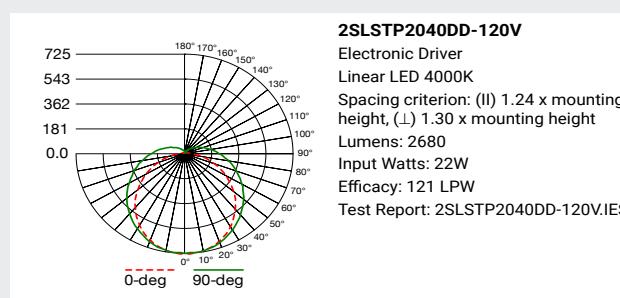

- May be surface, suspended, or wall mounted
- Multiple 7/8" K.O. on back and one on each end

Compliance

- cULus listed for damp location rated
- LED's comply with IESNA LM-79 and LM-80 standards
- Under 4", ADA Compliant. DesignLights Consortium® Qualified and classified for DLC Standard, refer to www.designlights.org for details
- RoHS compliant
- Suitable for use in closet storage spaces when installed in accordance with NFPA-70 and NEC 410.16 spacing requirements

Warranty

- Five year limited warranty

POSE®

SURFACE MOUNT - Right Angle Indirect

● SPECIFICATIONS

CONSTRUCTION

Housing	Extruded aluminum (0.05" nominal) Up to 70% recycled content
End Cap	Cast aluminum
Interior Brackets	Die formed sheet steel (22 gauge)
Reflectors	White powder coated sheet steel (24 gauge)
Lenses	Extruded acrylic (0.070" nominal)

● ELECTRICAL

Power over Ethernet MOLEX

POE drivers* (consult factory for more information)	IGOR SMARTENGINE O - Other (Consult factory)
UL2108 certified for integral or remote driver	

Emergency

Remote emergency battery pack or emergency circuit optional.

Input Voltage

120V, 277V, 347V (remote), UNV.

! Incorporating these components may have limitations or affect the length of the luminaire, please contact factory for more details.

● LED SYSTEM

CRI Minimum 80 or 90 color rendering index.

CCT Choice of 2700K, 3000K, 3500K and 4000K color temperature with a great color consistency (within 3-step MacAdam ellipse). Both within fixture and fixture to fixture.

LED life Minimum 50,000h with 85% of lumen maintenance in 25°C ambient temperature, in compliance with IES LM-80 testing measurements.

Thermal Management Aluminum housing acting as the heat sink to maximize life.

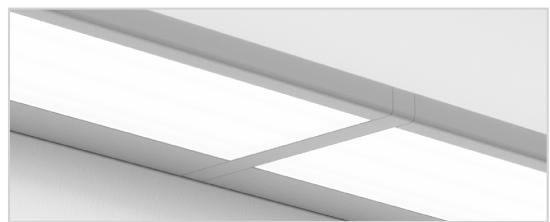

Environment Dry and damp rated for indoor use only in operating ambient temperatures of 0-40°C (32-104F).

● OPTICS

A Clear lens is used when the asymmetric optic is chosen.
A Diffused lens is used when the Lambertian optic is chosen.

● SYSTEM (S(L))

POSE linear systems, with the use of a strong profile, allow for a connection system of continuous runs. Lengths of 2' min, 1' increments, 8' max stand alone, as well as custom lengths are available. Runs of POSE that are greater than 8' in length are designated as systems (S(L)). This means that the run is comprised of a combination of sections to be assembled on site using our joining system. For more information on systems and joining, please refer to the POSE installation sheets available for download at www.axislighting.com.

● WARRANTY

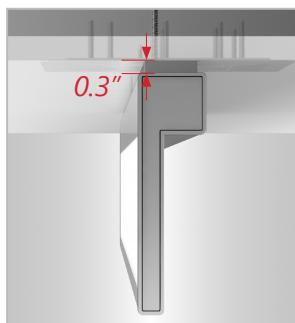

Limited 5-year warranty is available. Warranty is valid provided luminaires are installed and used according to specifications. For full terms and conditions, please consult warranty section at axislighting.com.

Mounting flexibility, multiple application solutions

Choose from surface mount (MT) or recessed mount (DF) or spackle mount (DS) tracks.

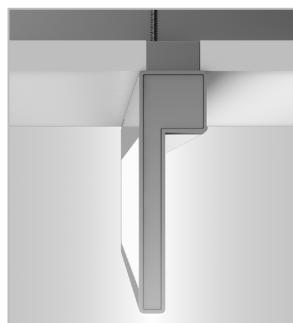

SURFACE MOUNT TRACK (MT)

0.3" offset from wall or surface

DRYWALL FLANGE (DF)*

Flush with wall

*min 5/8 thick drywall

DRYWALL SPACKLE (DS)

Flush with wall

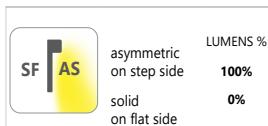

POSE®

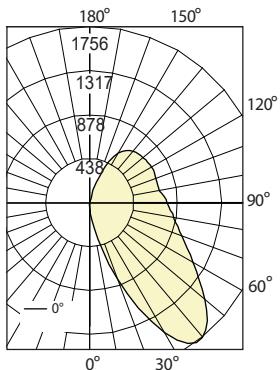

SURFACE MOUNT - Right Angle Indirect

● PHOTOMETRIC DATA

1000 lm/ft

PHOTOMETRIC CURVE

Total Lumens: 3999 lm (for 4ft)
Input Watts: 38.08 W
Efficacy: 105 lm/W

80 CRI shown. For 90 CRI, divide wattage by 0.8 and multiply efficacy by 0.8.

Floodlight · Wide beam

BEGA

Application

Compact rectangular floodlight with mounting canopy and outrigger arm. Designed to illuminate architecture and signage. Pair with a variety of optical accessories.

Materials

Clear safety glass with optical texture
Marine grade, copper free ($\leq 0.3\%$ copper content) A360.0 aluminum alloy
High temperature silicone gasket
304 stainless steel outrigger arm
Pure anodized aluminum reflector

NRTL listed to North American Standards, suitable for wet locations
Protection class IP 65

Weight: 5.3 lbs.

EPA (Effective projection area): 0.5 sq. ft.

Electrical

Operating voltage	120, 220-240 OR 277 VAC
Minimum start temperature	-30°C
LED module wattage	17.9 W
System wattage	20.4 W
Controllability	0-10V dimmable
Color rendering index	Ra > 80
Luminaire lumens	2456 lm
LED service life (L70)	60000 hrs

LED color temperature

- 4000K (K4)
- 3500K (K35)
- 3000K (K3)
- 2700K (K27)

BEGA can supply you with suitable LED replacement modules for up to 20 years after the purchase of LED luminaires - see website for details

Finish

All BEGA standard finishes are matte, textured powder coat with minimum 3 mil thickness. BEGA Unidure® finish provides superior fade protection in Black, Bronze, and Silver. BEGA standard White is a super durable polyester powder. Optionally available RAL and custom color finishes provided in either polyester powder or liquid paint.

<p>NOTES:</p> <ol style="list-style-type: none"> Customer is responsible for engineering analysis to confirm pole and fixture compatibility for all applications. Refer to our white paper WP13001EN for additional support information. DesignLights Consortium® Qualified. Refer to www.designlights.org Qualified Products List under Family Models for details. Coastal construction finish salt spray tested to over 5,000-hours per ASTM B117, with a scribe rating of 9 per ASTM D1654. Not available with TH option. When using SA light squares, Output Level 4 not available with color temperatures 722, 727, 827, 830 or 930 when HSS is present. Not available with Coastal Construction (CC) option. Not available with voltage options H, 8 or 9. Not available with SB1A or SB2A configurations. Not available in combination with HA high ambient and sensor options at Output Level 3. H voltage not available with sensor options, choose voltage 8 or 9. SP arm limited to 3" O.D. vertical tenon. SP2 limited to 2-3/8" O.D. vertical tenon. One required for each Light Square. 2L is not available with SB light squares. Not available with SPB at 347V or 480V. Not available with WaveLinx or 20kV surge options. Requires PR7. Replace XX with sensor color (WH, BZ or BK). WAC Gateway required to enable field-configurability: Order WAC-PoE and WPOE-120 (10V to PoE injector) power supply if needed. WAC not required for LC Bluetooth sensors. Narrow-band 590nm +/- 5nm for wildlife and observatory use. Choose Output Level 1; supplied at 500mA drive current only. Not available with SB light squares. Exact luminaire wattage available in IES files. Available with 5WQ, 5MQ, SL2, SL3 and SL4 distributions. Can be used with HSS option. Set of 4 pcs. One set required per Light Square. HA option not available with Output Level 4 or AMB Amber. Not for use with T1, 5NQ, 5MQ, 5WQ or RW optics. 								
<ol style="list-style-type: none"> Cannot be used with other control options. Low voltage control lead brought out 18" outside fixture. Not available with DALI or integrated controls options. Not available if any SPB, LWR, or WaveLinx sensor is selected. Motion sensor has an integral photocell. Requires the use of BPC photocontrol or photocontrol receptacle with photocontrol accessory. Not available with SB light squares when using Output Level 4. Not for use with T4FT, T4W or SL options. See IES files for details. Not available with SB light squares. SPB configuration required for configuration required for configuration. See controls page for details. Replace X with number of Light Squares controlled by the SPB, referencing the "SPB/X Availability Table" on the controls page. McGraw-Edison**GALN Galleon II****Optical Distributions****Product Specifications****Construction**

- Die-cast aluminum housing and heat sink
- Three housing sizes, using 1 to 9 light squares

Optics

- High-efficiency injection-molded AccuLED Optics technology
- 17 optical distributions for area site and roadway applications
- 3 shielding options include HSS, GRS and PFS
- IDA Certified (3000K CCT and warmer only, fixed mounting options)

Electrical

- Removable power tray assembly includes drivers, surge modules and control modules for ease of maintenance and serviceability
- Standard with 0-10V dimming
- Standard with 10kV surge module, optional 20kV surge module
- Suitable for operation in -40°C to 40°C ambient environments. Optional 50°C high ambient (HA) configuration
- Luminaire available with the field adjustable dimming controller (FADC) to manually adjust wattage and reduce the total lumen output and light levels. Comes pre-set to the highest position at the lumen output selected

Mounting

- Arms are factory installed, enabling closed-housing installation
- All arms suitable for round or square pole installation
- All arms provide clearance for multiple fixture installations at 90°

Finish

- 6 standard finishes use super durable TGIC polyester powder coat paint, providing 2.5 mil nominal thickness and salt-spray tested to 3,000 hours per ASTM B117
- RAL and custom color matches available
- Coastal Construction (CC) option salt-spray tested to 5,000 hours per ASTM B117, achieving a scribe rating of 9 per ASTM D1654

Typical Applications

- Outdoor, Parking Lots, Walkways, Roadways, Building Areas

Warranty

- Five-year limited warranty. Consult website for details.

McGrath-Edison

GALN Galleon II

Control Options

0-10V (DIM)

This fixture is offered standard with 0-10V dimming driver(s). The DIM option provides 0-10V dimming wire leads for use with a lighting control panel or other control method.

Photocontrol (BPC, PR and PR7)

Optional button-type photocontrol (BPC) and photocontrol receptacles (PR and PR7) provide a flexible solution to enable "dusk-to-dawn" lighting by sensing light levels. Advanced control systems compatible with NEMA 7-pin standards can be utilized with the PR7 receptacle.

After Hours Dim (AHD)

This feature allows photocontrol-enabled luminaires to achieve additional energy savings by dimming during scheduled portions of the night. The dimming profile will automatically take effect after a "dusk-to-dawn" period has been calculated from the photocontrol input. Specify the desired dimming profile for a simple, factory-shipped dimming solution requiring no external control wiring. Reference the After Hours Dim supplemental guide for additional information.

Dimming Occupancy Sensor (SPB and MS/DIM-LXX)

These passive infrared (PIR) sensors are factory installed in the luminaire housing. When the SPB (FSP-321 or FSP-311) or MS/DIM (FSP-211) sensor options are selected, the occupancy sensor is connected to a dimming driver and the luminaire dims when no motion is detected. After a set period of time, the luminaire turns off, and when motion is detected, the luminaire returns to full light output. Both sensors are factory preset to dim down to approximately 10% power with a time delay of five minutes. The MS/DIM sensor requires the FSIR-100 programming tool to adjust factory defaults. The SPB sensor default parameters are listed in the table below and can be configured utilizing the Sensor Configuration mobile application for iOS and Android devices. The SPB/X is configured to control only the specified number of light squares (See SPB/X Availability Table below.) An integral photocontrol can be activated with the app for "dusk-to-dawn" control or daylight harvesting - the factory default is off. Four sensor colors are available; Bronze, Black, Gray and White, and are automatically selected based on the luminaire finish as indicated by the table below.

SPB sensor finish matched to luminaire finish	
Luminaire Finish	SPB Sensor Finish*
WH	White
BK	Black
GM	Graphite Metallic
BZ	Bronze
AP	Gray
DP	Dark Platinum

*SPB bezel color automatically selected based on luminaire finish

WaveLinx Wireless Control and Monitoring System

Operates on a wireless mesh network based on IEEE 802.15.4 standards enabling wireless control of outdoor lighting. WaveLinx (WPS2 to WPS4) outdoor wireless sensors offer passive infrared (PIR) occupancy and photocell for closed loop daylight harvesting, and can be factory or field-installed. Sensors are factory preset to dim down to 50% after 15 minutes of no motion detected. Two lens options are available for mounting heights of 7' to 40'. Use the WaveLinx mobile application for set-up and configuration. At least one Wireless Area Controller (WAC) is required for full functionality and remote communication (including adjustment of any factory pre-sets). WaveLinx Lite (WLS4 and WLS2) outdoor wireless sensors provide PIR occupancy and photocell for closed loop daylight harvesting, and can be factory or field-installed. Sensors are factory preset to dim down to 50% after 15 minutes of no motion detected. Two lens options are available for mounting heights of 7' to 40'. Use the WaveLinx Lite mobile application for set-up and configuration. WAC not required. WaveLinx Outdoor Control Module (WOLC-7P-10A) accessory provides a photocontrol enabling astronomic or time-based schedules to provide ON, OFF and dimming control of fixtures utilizing a 7-PIN receptacle. The out-of-box functionality is ON at dusk and OFF at dawn.

For mounting heights up to 15' (WPS2 and WLS2)

For mounting heights up to 40' (WPS4 and WLS4)

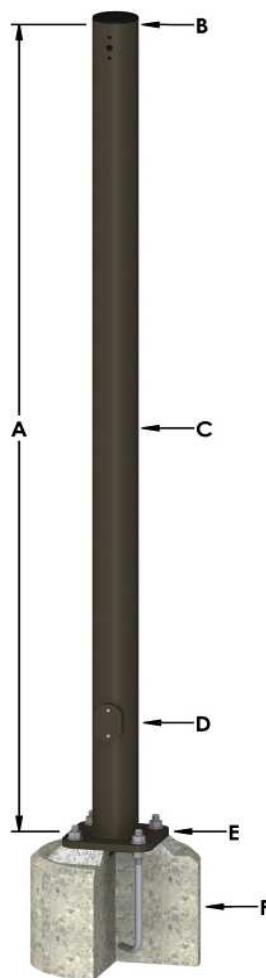

AirMesh (DIM10)

AirMesh integrated wireless controls system includes factory installed DIM10 Synapse control module and FSP-201 motion sensor; requires additional AirMesh components for operation. Contact Synapse at www.synapsewireless.com for product support, warranty and terms and conditions.

RSP Round Non-Tapered Steel Poles

PROJECT NAME

GENERATION DATE 11/12/2024

CATALOG NUMBER **RSP20 - 5 - 11 - BRZ - DM10 - BC****A — POLE SHAFT**

The pole shaft is single piece construction, being fabricated from a weldable grade carbon steel structural tubing and shall conform to ASTM A500 Grade C with a minimum yield strength of 50,000 psi. The pole shaft has a full-length longitudinal resistance weld and is uniformly cylindrical in cross-section with round sides and excellent torsional properties.

HEIGHT BASE OD GAUGE WEIGHT EPA MAX LOAD 90 MPH AASHTO

20' 5" 11 159 lbs 12.5

B — MOUNTING DESIGNATION

Drilled for 1 Luminaire

**C — FINISH**

Standard - The standard finish is a polyester thermosetting powder coating applied to the surface of the substrate to a minimum of 3 mils for all color finishes.

FINISH TYPE

Net 30 days from the date of Company's invoice unless otherwise specified. A 1-1/2% per month late charge will be added to accounts past due

PRICES

Published prices are subject to change without notice. Possession of price sheets in no way obligates Company to sell to the Purchaser possessing such price sheet. All orders are subject to final approval and acceptance by the Company. Once accepted and approved, orders will be billed at prices currently in effect at the time of invoicing, or at prices quoted by the Company and accepted by the Purchaser if the order involves an item or items covered by special quotation. THE MINIMUM INVOICE CHARGE SHALL BE \$50.00 NET

DELIVERY

All goods sold are deliverable F.O.B. KW Industries, Inc., Sugar Land, Texas 77478

FREIGHT

All of the Company's products are priced and sold F.O.B. KW Industries, Inc., Sugar Land, Texas 77478. Transportation charges will be prepaid by the Company and added to the net sales price unless specified by the Purchaser.

ROUTING

The Company will specify the method and routing of all products to ensure the most efficient and economical shipment in behalf of the Purchaser. The Purchaser will assume charges for special services such as cartage, air freight, express or multiple deliveries on one order.

CANCELLATION

The written consent of the Company shall be obtained prior to a cancellation of any order. Cancellation of an order may subject the Purchaser to a cancellation charge based upon expenses already incurred and commitments made by the Company.

RETURNED GOODS

Specific written request and arrangements must be made in advance for Purchaser to obtain credit or replacement on material returned. On material accepted for return, Purchaser must prepay return shipment and pay minimum restocking charge of 40% plus any charge necessary to rework goods to a resaleable condition. Custom fabricated products by special order are not subject to return.

DELAYS, DAMAGE OR LOSS

The Company is not and shall not be liable for delays in shipment or delivery of its products when caused by strikes, riots, hurricanes, civil disorder, fires, material shortage, breakdown in manufacturing facilities or any other cause beyond its reasonable control. Any claims for damages, loss or shortage in transit must be made by the Purchaser to the delivering carrier. The risk of loss passes to the Purchaser upon delivery to the carrier.

LIMITED WARRANTY

The Company warrants to Purchaser that its products will be free from defects in material and workmanship for a period of one year from the date of shipment by the Company (the "Warranty Period"). This Warranty specifically excludes fatigue failure or similar phenomena resulting from induced vibration, harmonic oscillation or resonance associated with the movement of air currents around the product. If during the Warranty period, the product proves defective in material or workmanship, the Company shall correct any defect, at its option, either by repairing any defective parts or by making available at the Company's plant a repaired or replacement part at no charge to the Purchaser, if the Purchaser promptly notifies the Company and furnishes proof of Purchase. The liability of the Company under this Warranty, or for any loss or damage arising out of, or connected with, the design, manufacturing, sale or use of its products, whether the claim is based on contract or negligence, shall not exceed the price allocable to the value of the product or part which gives rise to the claim and upon expiration of the Warranty Period all such liability shall terminate. The Company shall not be liable for special or consequential damages including, but not limited to, loss of profits or revenue, loss of use of the product, cost of substitute products or labor charges to remove or reinstall the defective product, nor any product transportation expenses to and from the Company's plant if factory repair or replacement is necessary. No warranty is made with respect to parts or auxiliary equipment not manufactured by the Company. The foregoing Warranty is exclusive and in lieu of all other warranties whether written, oral, express or implied and shall constitute the sole and exclusive remedy of the Purchaser and liability of the Company. NO WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE SHALL APPLY. The Company's products are not sold as a "consumer product" under 15 U.S.C. 62301.

GENERAL

KW Industries, Inc. reserves the right to change any feature of its published specifications without notice to promote product improvement and/or allow for material availability. The contract for the sale of goods by KW shall be performable in Fort Bend County, Texas. Prices subject to change without notice.

Product Specifications

Lamp Data

- LED, Red or Green: Super-bright, long-life LEDs provide uniform illumination

Electronic

- Dual voltage input 120/277 VAC, 60Hz
- Long-life energy efficient LED lamps
- AC only and AC with battery backup models
- Solid-state Voltage Charger
- Solid-state Switching
- Brownout Circuit
- Low-Voltage disconnect
- Test Switch/Power Indicator Light

Housing Construction

- Extruded aluminum housing
- Steel recessed housing, aluminum trim plate
- Pivot design allows simple installation for surface, recessed wall, ceiling and sloped ceilings
- Canopy provided for surface mounting
- Extruded aluminum housing with adjustable galvanized steel hanger bars provided for recessed mounting
- Standard satin aluminum finish blends with most decors

Lens

- Injection molded acrylic panels
- NFPA 101 compliant field installable chevron directional indicators
- Bright red and green letter colors
- 6" Letters
- Single-sided clear and double-sided mirror panels provided with each exit

Brownout Circuit (SCX7 Battery Backup Models)

- Monitors flow of AC current
- Activates the emergency lighting system when a predetermined reduction/dip of AC power occurs (a dip in voltage will cause most ballasted products to extinguish, causing loss of normal lighting though a total power failure has not occurred)

Low Voltage Disconnect (SCX7 Battery Backup Models)

- Low-voltage circuitry disconnects the lighting load when battery's terminal voltage falls
- Disconnect remains in effect until normal utility power is restored, preventing deep battery discharge

Test Switch/Power Indicator Light (SCX7 Battery Backup Models)

- Switch located on the side of the exit permits the activation of the emergency circuit for complete operational systems check
- Indicator light provides visual assurance the AC power is on

Battery

- Sealed nickel cadmium
- Maintenance free, long life
- Full recharge time, 24 hrs (max.)
- Operating temperature 10°C to 40°C

Code Compliance

- UL 924 Listed
- Life Safety NFPA 101
- NEC/OSHA
- Most State and Local Codes
- CEC Title 20

Limited Warranty

- Exit: 5-year Limited Warranty
- Battery: 2-year Limited Warranty

Product Specifications

Lamp Data

- LED, Red or Green: Super-bright, long-life LEDs provide uniform illumination

Electronic

- Dual voltage input 120/277 VAC, 60Hz
- Long-life energy efficient LED lamps
- AC only and AC with battery backup models
- Solid-state Voltage Charger
- Solid-state Switching
- Brownout Circuit
- Low-Voltage disconnect
- Test Switch/Power Indicator Light

Housing Construction

- Extruded aluminum housing
- Steel recessed housing, aluminum trim plate
- Pivot design allows simple installation for surface, recessed wall, ceiling and sloped ceilings
- Canopy provided for surface mounting
- Extruded aluminum housing with adjustable galvanized steel hanger bars provided for recessed mounting
- Standard satin aluminum finish blends with most decors

Lens

- Injection molded acrylic panels
- NFPA 101 compliant field installable chevron directional indicators
- Bright red and green letter colors
- 6" Letters
- Single-sided clear and double-sided mirror panels provided with each exit

Brownout Circuit (SCX7 Battery Backup Models)

- Monitors flow of AC current
- Activates the emergency lighting system when a predetermined reduction/dip of AC power occurs (a dip in voltage will cause most ballasted products to extinguish, causing loss of normal lighting though a total power failure has not occurred)

Low Voltage Disconnect (SCX7 Battery Backup Models)

- Low-voltage circuitry disconnects the lighting load when battery's terminal voltage falls
- Disconnect remains in effect until normal utility power is restored, preventing deep battery discharge

Test Switch/Power Indicator Light (SCX7 Battery Backup Models)

- Switch located on the side of the exit permits the activation of the emergency circuit for complete operational systems check
- Indicator light provides visual assurance the AC power is on

Battery

- Sealed nickel cadmium
- Maintenance free, long life
- Full recharge time, 24 hrs (max.)
- Operating temperature 10°C to 40°C

Code Compliance

- UL 924 Listed
- Life Safety NFPA 101
- NEC/OSHA
- Most State and Local Codes
- CEC Title 20

Limited Warranty

- Exit: 5-year Limited Warranty
- Battery: 2-year Limited Warranty

GMDS – Momentary Decorator Switch

Catalog#	Prepared by
Project	Date
Comments	Type

Overview

The Momentary Decorator Switch is a system accessory for the Greengate Lighting Control System. This switch is recommended for most low voltage switching applications and fits a standard decorator wallplate.

Features

- When pressed, momentary contact establishes circuit contact in the closed position. When not pressed, the switch is in the (open) position.
- Thermoplastic rocker, top, and backbody are virtually unbreakable to deliver years of durable performance
- Tri-combo screw heads offer greater installation flexibility

Technical Data
October 2014

GMDS – Momentary Decorator Switch

Specifications

Switch Type	Momentary Contact
Standards	UL Listed

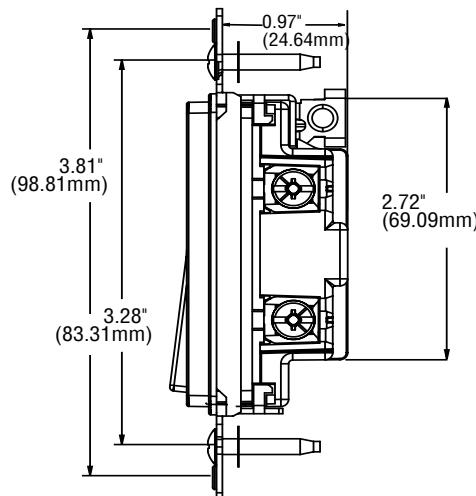

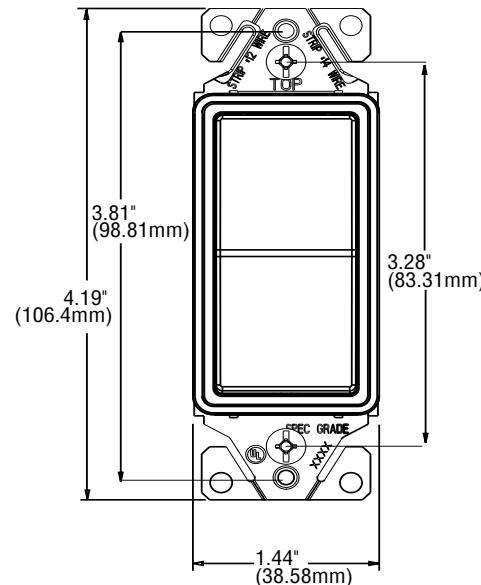

Description/Operation

The Momentary Decorator Switch is a line voltage switch used as a low voltage contact closure device used with Greengate Lighting Control Panels and Occupancy Sensors. When toggled, the switch momentarily makes a contact closure to the lighting control panel or occupancy sensor, sending an "ON" signal. When not pressed, the switch is in the (open) position.

Installation

This system accessory will require wall mounting and wiring at the site.

LightLEEDer

EVO-Integrated -2 Relay Controller

Overview

The LightLEEDer EVO Integrated 2 Relay Controller can operate up to two loads. This Controller includes the configuration options of an EVO with two on-board relays and 0-10V dimming integrated into one package for easy installation. The LLEVO-INT-2 relay Controller is ideal for a small office with two zones of lighting control with daylight harvesting or one lighting zone and a plug load. It has RJ-45 ports for local digital LightSync switches, occupancy sensors, and a photo sensor. This convenient and easy to install two relay Controller can be used as a stand-alone device or networked with other LightLEEDer panels.

Features

- **Made in the USA**
- **2 Isolated load relays** rated up to 20 Amps for lighting loads or plug-loads
- **Galvanically Isolated** 0-10V dimming outputs
- **Occupancy sensor** input RJ-45 port for motion sensor occupancy or vacancy control
- **Photocell Sensor** input RJ-45 port for daylight monitoring
- **RJ-45** port for digital LightSync switch devices
- **Power** for digital LightSync switches, photocell sensor and occupancy sensors
- **Easy installation** with everything Integrated in one convenient box
- **Oversized relays** for extended life of product with contacts designed for LED inrush current
- **Room Controller** remote panels supported
- **Pre-programmed** configurations for vacancy (F1) or occupancy (F2) motion sensors operation and LSG3 switches
- **Standalone or Networked** with any LightLEEDer controller or EVO panel
- **Plenum rated**

LightLEEDer

EVO-Integrated -2 Relay Controller

Physical

Specifications

Safeguards:

- Power surge and spike suppression up to 123 volts from power supply to controller
- Memory retention for firmware and programming up to 200 years and electrostatic discharge to 4kV
- Galvanically isolation to 1500V for the 0-10VDC dimmer outputs, with revert to 100% on power loss

Physical:

- Enclosure: 3.10" x 3.50" x 1.875"
- Plastic enclosure with 1/2" nipple and mounting tab
- Color coded wire leads for easy field termination
- RJ-45 connectors provide for easy connections

Interfaces:

- Network In/Out ports for LightLEEDer system connection
- Occupancy sensor input with RJ-45 port
- Photocell Sensor input with RJ-45 port for daylight sensor
- RJ-45 port for up to 61 digital LS CAT-5 device addresses

Operating Environment:

- Location: Interior space
- Operating Temperature: 0° to 50° C
- Humidity: 10% - 90% Non-condensing
- Atmosphere: Non-explosive/corrosive
- Vibration: Stationary

Electrical:

- 120/277VAC @ .6 amps
- Dimming: 100mA sink per isolated output

Relays:

- 16A, 120/277VAC Electronic Ballast (LED)
- 20A 120/277VAC General
- 1/4 HP @ 120 VAC Motor Load

- Inputs: 24VDC
- Powered LS Devices, Distance, Input power available
- 1 CAT-5 Devices, 300' accumulative, 70mA Occupancy sensor power
- 2 CAT-5 Devices, 500' accumulative, 60mA Occupancy sensor power
- 3 CAT-5 Devices, 600' accumulative, 50mA Occupancy sensor power
- 4 CAT-5 Devices, 900' accumulative, 40mA Occupancy sensor power

Note: Additional CAT-5 devices can be supported by adding a LSPSR, LSPSR4 or LSPSR6

Certifications and Approvals:

- UL and CUL listed
- FCC Part 15
- Title 24
- ASHRAE compliant
- IECC compliant
- Plenum rated

LightSync Digital

Ceiling Occupancy Sensor

Overview

The LightSync Digital Occupancy Sensor is a low profile ceiling mount sensor designed to install in a standard commercial ceiling. The sensor is provided with dual-tech operation with passive Infrared and overlapping passive acoustic sensing. Configured over the LightSync digital bus for easy set-up and adjustment, this sensor supports occupancy and vacancy in a single device. The occupancy sensor also has a full range photo sensor supporting open loop or closed loop daylight dimming. The LS digital occupancy sensor uses the newest digital components and detection techniques for superior performance. Sensors detect occupant movement as they move through the field of view via passive infrared technology. Acoustic technology enables enhanced detection once the lighting is turned on.

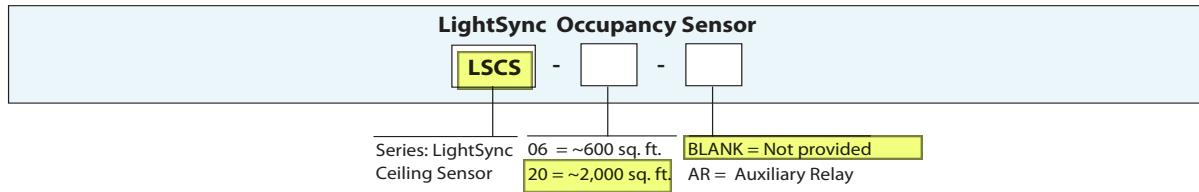

Features

- Made in the USA
- Low profile ceiling mount dual-tech occupancy and vacancy sensor
- Field configurable for PIR or acoustic sensing operation
- Sensitivity adjustments for passive infrared and acoustic can be independently adjusted to three different levels
- Automatic Gain Control filters background noise to fine tune acoustic sensitivity
- Field configured setting for "no touch" adjustment are all done from the ILC LightLEEDer Pro software
- Dual tech operation is triggered by PIR and uses the acoustic for holding a On state
- Cat-5 ready digitally addressable device
- LED indicators and acoustic sensing can be independently disabled
- Connects directly to a LightLEEDer panel or LLEVO local bus as a LightSync digital device for power and communication, no external power pack required
- Panel level configuration for relay on/off and dimmer control to the local panel or over the ILC network
- Provides control for Relays, Presets, Groups, and Scenes
- Built in selectable photo sensor for full range continuous daylight dimming control
- Auxiliary Relay output for connection to BAS system or Plug-load power pack

LightSync Digital

Ceiling Occupancy Sensor

Physical

Junction Box Mounting Plate

8 feet to 15 feet mounting height recommended for small and large motion lenses, coverage pattern pending validation

Designed to be installed into ceiling tile with spring clips or onto junction box with trim ring cover

8 feet to 15 feet mounting height recommended for small and large motion lenses, coverage pattern pending validation

Specifications

Physical:

- 3.6" W x 3.6H x 1.4D (91mm x 91mm x 36mm)
- Low profile recessed ceiling mounting
- Spring retention clips for mounting in 3" hole
- Junction box mounted plate and trim ring provided
- RJ-45 In/Out ports
- Digital addressing switches
- 2-Wire #20AWG leads for auxiliary relay output

Operation:

- Selectable PIR or Dual Tech operation from the LightLEEDer panel or LightLEEDer Pro software
- Time Delay is set from LightLEEDer panel software
- Photo sensor for daylight dimming control configured from LightLEEDer software
- An initial PIR event is required to enable acoustic functionality
- Acoustic sensing overlaps and enhances/extends overall detection and time delay
- Automatic gain control filters ambient noise
- Sensor will re-trigger with acoustic only after an initial 5 minute time-out before a PIR trigger is required to restart the cycle
- Daylight Harvesting photocell sensor can be enabled for true full-range control with 0-255 step resolution in the 0 to 1,800 fc range
- Supports all standard ILC photocell sensor control options
- AR Option provides a auxiliary relay for BAS or plug-load power pack operation

Electrical:

- Powered from the ILC LightSync bus
- Auxiliary relay option supports a 2Amp, 30VDC, NO or NC contact output

Operating Environment:

- Location: Interior space
- Operating Temp: 0° to 40° C (32°F to 104°F)
- Humidity: 10% - 90% Non-condensing
- Atmosphere: Non-explosive/corrosive
- Vibration: Stationary

Certifications and Approvals:

- Class 2 inputs
- FCC Part 15
- Meets local energy codes

LightSync Digital

G3 Switch

Overview

The LightSync Digital G3 Switch Station is a modern, versatile and easy to use CAT-5 or 6 device. The G3 comes pre-configured as a Multi-Zone Dimmer, Scene Switch, Scene Multi-Zone Dimmer switch combination or a Non-Dim switch. The MZD supports 1-6 zone, Scene have 1-5 Scenes, Scene MZD stations support a 2S/4Z, 3S/3Z or 4S/2Z combo, the Non-Dim has 1-7 buttons. The dimming buttons allow Press-and-Hold Ramp-Up/Ramp-Down operation, holding a zone button on an MZD will select that zone for individual dimming. All scene buttons support capture of dimming levels to a scene by holding the scene button. G3 digital switches can control and display status for relays, groups, presets or scenes. Stations are also available with Bluetooth for programming and control from the ILC Pro app.

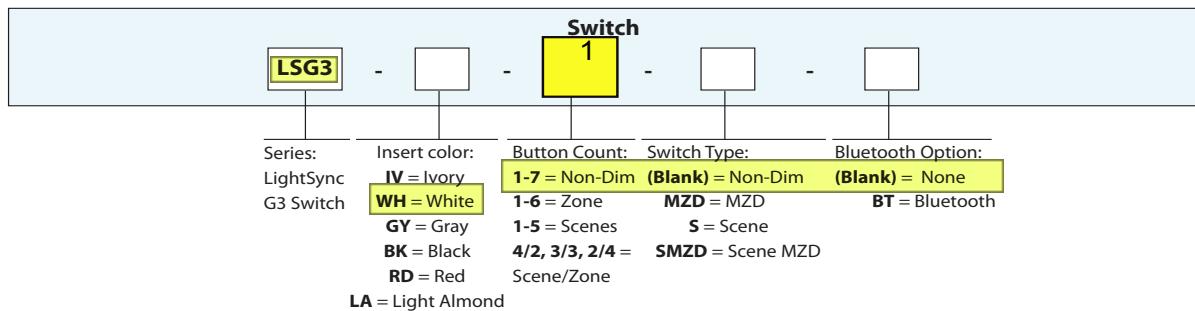

Features

- **Made in the USA**
- **Bluetooth** option for programming and control from EVO-BT app
- **Field Configurable** between multi-zone switches, scene switches and non-dim switches
- **1 to 7 button** zone control configurations
- **Multi-Zone Dimming** for up to 6 zones and All-Off
- **Scene Station** with dimming for up to 5 scenes and All-Off
- **Scene Multi-Zone** with dimming combo for up to 4 Scene or Zones (2S/4Z, 3S/3Z or 4S/2Z) option
- **Scene Capture** operation for all stations with scene buttons
- **Raise and Lower Buttons** for ramp up and ramp down feature
- **Press and Hold** dimming operation
- **Status LEDs** indicate true state of relay, group, last scene or preset
- **Switch Locator** LED helps find the switch in a dark room
- **Laser engraving** is provided, and custom engraving is available, Black and Red buttons are pad-printed
- **Color Change Kit** available for White, Ivory, Gray, Red, Black and Light Almond
- **Addressable** rotary switches
- **Decora®** style single-gang switch plate available upon request

Light sensing level (-R Models):

- 0 to 300 foot candles

Standards/Ratings

- cULus Listed - Energy Management Equipment (UL916)
- FCC Compliant
- RoHS Compliant

Warranty

Five year warranty standard

Overview

The Dual Technology sensor's combination of Ultrasonic and Passive Infrared technologies offers the most complete sensing equipment available today. MicroSet self-adjusting Dual Technology sensors drastically simplify and reduce a contractor's installation and adjustment time period.

The MicroSet self-adjusting technology continuously monitors multiple sub-frequencies in the event that a continuous Doppler shift occurs, such as those created by airflow from an air duct, the sensor will identify the noise as continuous and then block it out of view at a select sub-frequency. It will continue to monitor other sub-frequencies for human motion. This avoids false-activation, while still maintaining the high level of sensitivity that is necessary for sensing minor motion in a changing environment. Separate concurrent time delays for both Passive Infrared and Ultrasonic technologies avoid false activations or deactivations. In Automatic On Mode, the lights turn ON when a person enters the room. In Manual On Mode (-R model only), the lights are turned ON by activating a momentary switch (model # GMDS-*) that is connected to the sensor. When enabled, the daylighting feature (-R models only) prevents lights from turning ON when the room is adequately illuminated by natural light.

Greengate

OAC-DT-MicroSet

Wiring Diagrams

OAC-DT-2000-R Model

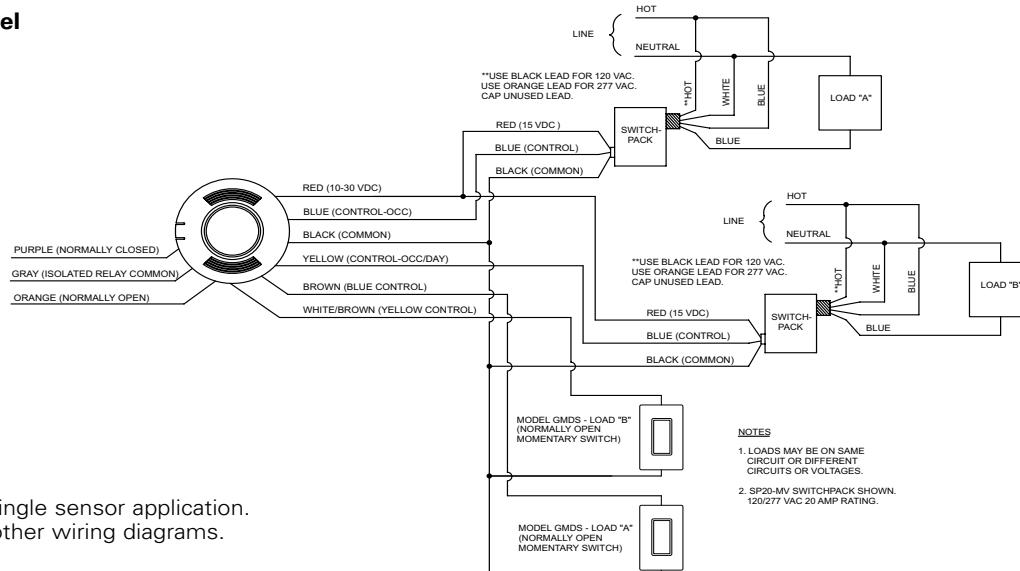

OAC AND VAC MANUAL MODE OPERATION:

1. SWITCHES ARE REQUIRED TO TURN CORRESPONDING LOADS ON.
2. LOADS TURN OFF WHEN SENSOR TIMES OUT OR WITH SWITCHES.
3. IF DAYLIGHT SENSOR IS ENABLED AND LIGHT LEVEL IS ABOVE SETPOINT, SWITCHPACK CONNECTED TO YELLOW LEAD WILL NOT TURN LOAD ON.

OAC AUTOMATIC MODE OPERATION:

1. WHEN SENSOR ACTIVATES, BOTH LOADS TURN ON.
2. SWITCHES CAN BE USED TO TURN LOADS ON OR OFF.
3. IF DAYLIGHT SENSOR IS ENABLED AND LIGHT LEVEL IS ABOVE SETPOINT, SWITCHPACK CONNECTED TO YELLOW LEAD WILL NOT TURN LOAD ON.

RECOMMENDED WIRE:
18-3 AWG STRANDED WIRE SHIELDED OR NON-SHIELDED

Product Features

Overview

The Dual Technology Single Level Occupancy Sensing Wall Switch is a motion sensing lighting control and conventional wall switch all-in-one that is used to for energy savings and convenience. It does not require a neutral wire for installation making it ideal for retrofit applications.

The ONW-D-1001-MV combines Ultrasonic (US) and Passive Infrared (PIR) sensor technologies to monitor a room for occupancy to deliver maximum energy savings and ensure the greatest sensitivity and coverage for tough applications without the threat of false triggers. PIR is used to turn the lights ON and then either or both technologies are used to keep the lights ON. In Automatic On Mode, the lights turn ON automatically when a person enters the room. In Manual On Mode, the lights are turned ON by pressing the universally recognized light icon pushbutton. The sensor includes self-adaptive technology that continuously self-adjusts sensitivity and time delay in real-time, maximizing the potential energy savings that are available in the particular application.

Top Product Features

- Air-gap switch ensures no leakage current to load
- Selectable built-in light level sensor

Mounting Plate/Strap Dimensions: 4.195" H x 1.732" W (106.55mm x 44mm)

Mounting Plate/Strap Dimensions: ONW-D-1001-347: 4.35" H x 1.732" W (110.49mm x 44mm)

Product Housing Dimensions: 2.618" H x 1.752" W x 1.9" D (66.5mm x 44.5mm x 48.26mm)

Environment:

- Operating temperature: 32°F to 104°F (0°C to 40°C)
- Relative humidity operating: 20% to 90% non-condensing
- For indoor use only

Housing: Durable, injection molded housing. ABS resin complies with UL 94V-0

Mounting: Fits in a standard 3.5" deep back box Can be mounted in multiple gang back box Refer to NEC box calculation for properly sized mounting box

Electrical

Electrical ratings (per relay):

- 120 VAC
 - Incandescent / Tungsten max load: 6.7 amps, 800W, 50/60 Hz
 - Fluorescent / Ballast max load: 10 amps, 1200W, 50/60 Hz
 - Electronic Ballast (LED): 3A
 - Motor Load: 1/4 HP @ 125 VAC
- 277VAC
 - Fluorescent / Ballast max load: 9.8 amps, 2700W, 50/60 Hz
 - Electronic Ballast (LED): 3A
- 347VAC
 - Fluorescent / Ballast max load: 4.3 amps, 1500W, 50/60 Hz
 - Electronic Ballast (LED): 3A

Ballast compatibility:

- LED loads
- Magnetic and Electronic ballasts

Hardware Specifications

LED Indicators:

- Red LED = PIR detection
- Green LED = Ultrasonic detection

Controls and Performance

Time delays:

- Self adjusting 15 seconds/test (10 min. Auto)
- Selectable 5, 15, 30 minutes

Coverage:

- Major motion: 36' x 30'
- Minor motion: 20' x 16'

Light sensing level:

- 0 to 200 foot candles

Standards/Ratings

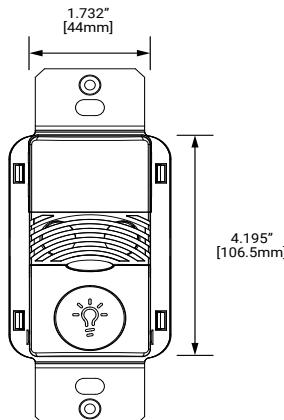

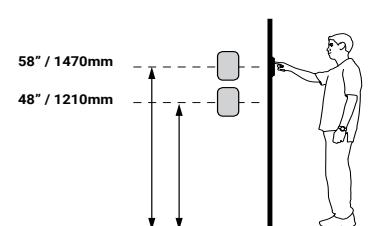

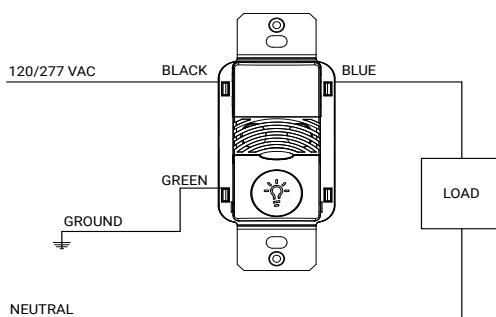

- cULus Listed - Energy Management Equipment (UL916)
- FCC Compliant
- RoHS Compliant

Warning

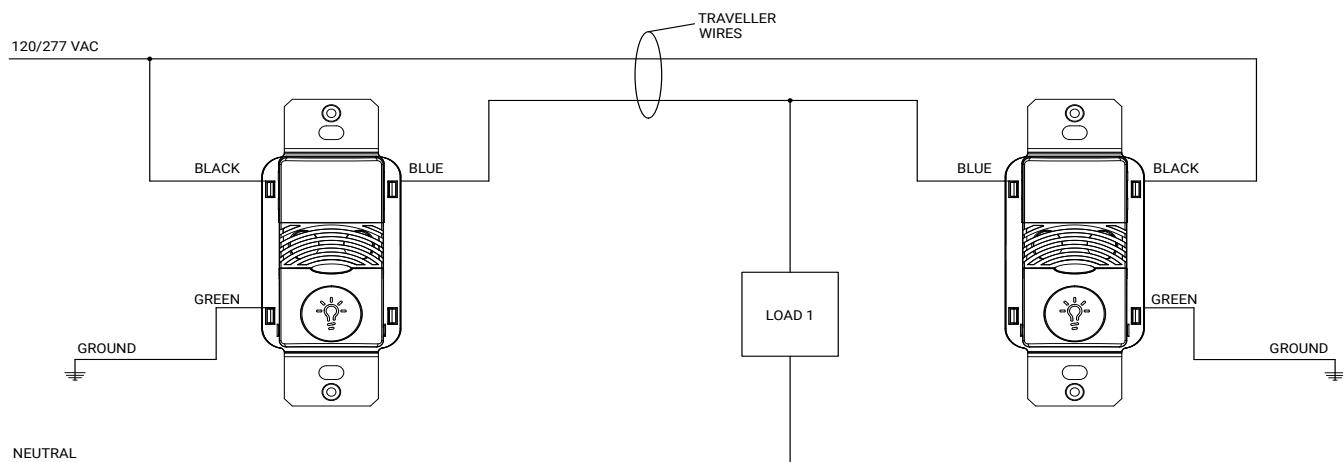

- This product is not intended to be used in applications involving the use of ammonia-based or VOC cleaners.
- Use of ammonia-based or VOC cleaners on this device must be avoided. Prolonged use may cause loss of integrity and expose electrified components. If this occurs, turn OFF power to the unit and replace.
- For detailed cleaning guidelines please refer to: Controls Care and Maintenance instructions at the end of this document.

 Control Systems

- Greengate

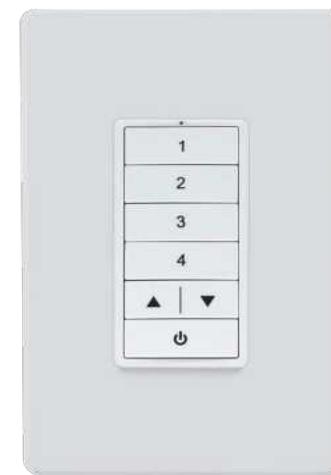

Cooper Lighting Solutions has developed recommended guidelines for cleaning our products that will not impact the operation or finish of the product.

Image for reference only

Recommended cleaning tips:

- **Never spray any fluids directly into the device.**
- **Use of ammonia-based or VOC cleaners on this device must be avoided.** Prolonged use may cause loss of integrity and expose electrified components. If this occurs, turn OFF power to the unit and replace.
- **Use a damp rag or single-use wipe** to avoid excess liquid penetrating the device.
- Be sure to wipe up remaining excess liquid after cleaning.
- Ensure the cleaning agent used does not have harsh chemicals such as bleach, ammonia, highly alkaline or concentrated acids (such as hydrochloric acid that can be found in household cleaners such as toilet bowl cleaners, bathroom tile and porcelain cleaners) as they could damage the device, causing them to become brittle and discolored.
- Cooper Lighting Solutions recommends the use of a mild liquid detergent and water to clean the devices. Single use wipes (e.g. Lysol brand or equivalent) are acceptable to use for cleaning the devices, however the single-use wipes **cannot contain bleach, ammonia, highly alkaline or concentrated acids.**

WARNING

This product is not intended for use in applications involving the use of ammonia-based or VOC cleaners.

Prolonged use may cause loss of integrity and expose electrified components.

If this occurs, turn OFF power to the unit and replace.

Recommended cleaning instructions:

- **Never spray any fluids directly into the device.**
- Apply the mild liquid detergent to a damp cloth or paper towel. Single use wipes (e.g. Lysol brand or equivalent) are acceptable to use for cleaning the devices, however single-use wipes cannot contain bleach, ammonia, highly alkaline or concentrated acids.
- If excess liquid is present, remove by wringing out the cloth or paper towel to avoid liquid penetration into the device.
- Clean the Cooper Lighting Solutions device by wiping over the surface with the damp cloth.
- Remove an excess liquid remaining on the device with a dry cloth or paper towel.

Greengate

Extreme Temperature PIR Ceiling Sensor

Overview

The Passive Infrared Extreme Temperature sensor provides consistent, stable coverage where extreme heat, cold or humidity must be accommodated and where there are wide fluctuations in temperature. Temperature compensating circuitry stabilizes sensitivity at temperatures -40° F to 125° F (-40° C to 52° C).

Mounting

SENSOR: The sensor mounts to normal ceiling tile through a $3/4"$ hole. The threaded mounting post may be cut down if it is too long to fit into the junction box. The sensor may also be surface mounted or mounted to a standard NEMA 2S or 4S junction box.

CAUTION: Finger-tighten the nut to avoid stripping the mounting post. Do not apply pressure to Fresnel lens.

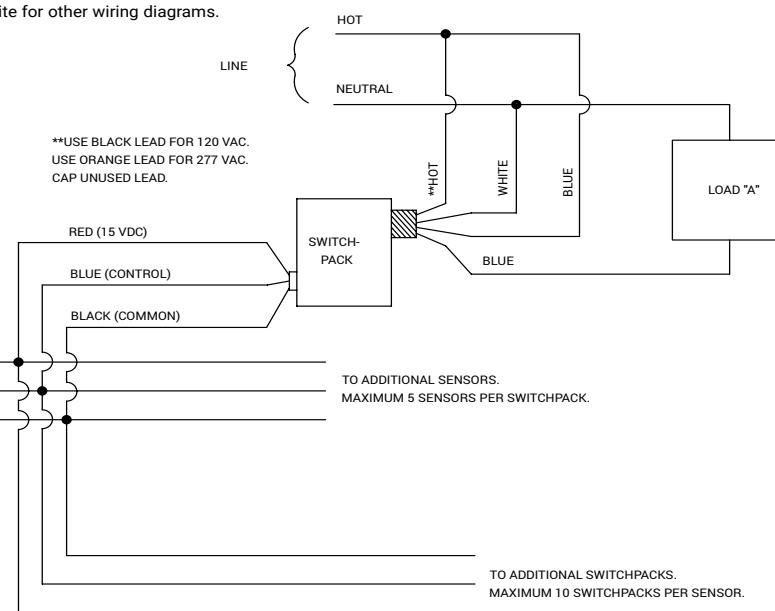

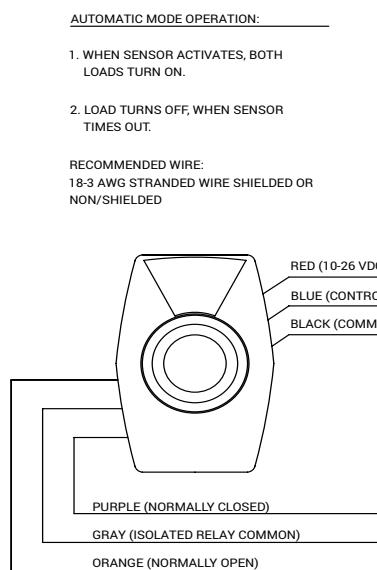

BACKPLATE: The sensor can be easily snapped onto or pulled away from the backplate without disturbing the mounting hardware. To pull the sensor away from the backplate, place your fingers on the door on the front of the sensor and slide your fingers up onto the back end of the sensor, with your fingers resting below the edge of the backplate. As you press against the sensor, use your other hand to grip the opposite end of the sensor and pull it away from the backplate.

To snap the sensor back onto the backplate, place the end of the sensor without a door against the backplate first, hooking the edge of the sensor on the two small prongs that extend from the backplate. Press the other end of the sensor against the backplate until it snaps into place.

SWITCHPACK: Designed to be mounted externally to any junction box. When mounted, the line connections are inside the box and the Class 2 wiring exits the rear of the Switchpack housing. In areas where Class 2 wiring is not permitted, the Switchpack can be mounted internally to any standard electrical box.

Wiring Diagram

Greengate

SP20-RD4 Heavy Duty Switchpack

Provides 24 VDC operating voltage to all low-voltage, 24 VDC occupancy sensors and daylighting controllers

Interactive Menu

- Order Information page 2
- Wiring Diagrams page 3
- Mounting Diagrams page 4
- Connected Systems page 4
- Product Warranty

Top Product Features

- Auto ON or Manual On
- Photocell ready
- Fail-safe circuitry – in the event of failure, return-to-closed (ON) capability
- Zero-crossing circuit provides increased durability, especially with today's high inrush loads
- Voltage regulated to 24VDC, 225mA
- LED ready
- Suitable for general purpose plug load control

Product Certification

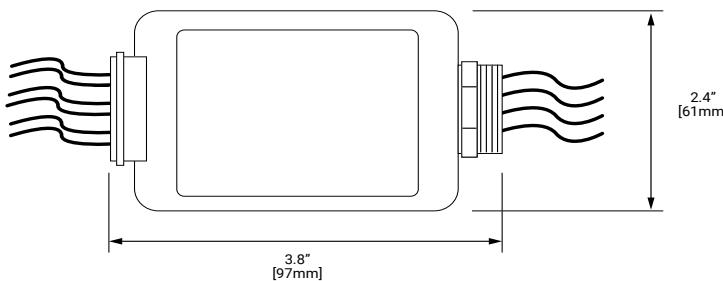

- Meets ASHRAE Standard 90.1 requirements
- Meets Title 24 requirements

Catalog Number

Catalog Number	Ratings	(LED) Ballast	General Purpose (Plug Load)	Motor (HP)	Output
SP20-RD4	120-230-277VAC, 50/60 Hz	16A	20A	1/2HP-120V, 2HP-250V	24 VDC, 225mA

Product Specifications

Key Features

- The SP20-RD4 is the latest addition to the Greengate Switchpacks family, delivering a wide array of switching solutions in a single unit
- This robust switchpack is designed to deliver unmatched performance
- The SP20-RD4 features robust and reliable mechanical latching relays, exclusive fail-safe circuitry, daylight harvesting, bi-level switching and is configurable for energy code requirements
- The switchpack is specifically designed to handle high inrush electronic ballast loads and offer unmatched durability and service
- Can be used to comply with NY LL48, IECC, ASHRAE 90.1 and Title 24, Part 6 daylight harvesting, demand response, bi-level switching and receptacle control requirements
- Auto-ON / Auto-OFF with local switch
- Manual-ON / Auto-OFF with local switch

Mechanical

Size: 2.40"H x 3.81"W x 1.43"D (60.96mm x 96.80mm x 36.37mm)

Environment:

- Operating temperature: 32°F - 122°F (0°C - 50°C)
- Relative humidity operating: 0-90%, non-condensing
- For indoor use only

Mounting: Plenum rated for external junction box mounting, with Teflon coated leads

Housing:

- Case: high impact, UL rated plastic
- Relay: 60A rated magnetic latching relay, silver alloy contacts
- Wire: 6" leads, 18AWG input; 14AWG load; LV connections: 8" leads 22AWG
- Medium impact injection molded housing.
- ABS resin complies with UL 94V-0.

Electrical

Input:

- 120-230-277VAC, 50/60 Hz

Output:

- 20A, 2400W @ 120V - Resistive
- 20A, 2400W @ 120V - General Purpose
- 20A, 2400W @ 120V - Incandescent

Greengate

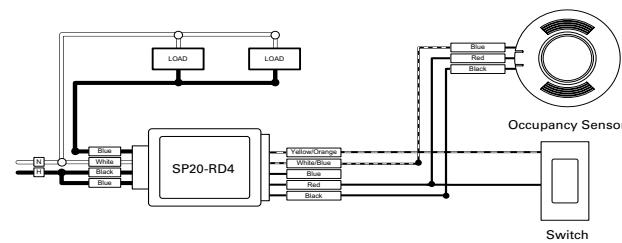

Heavy Duty Switchpack

Wiring Diagram

Photocell and Occupancy Sensor with Local Switch

Note: Switchpack and the load switched by the switchpack MUST be fed from the same phase.

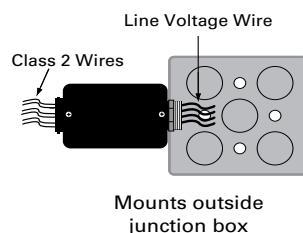

Troubleshooting

When testing a UL1008 transfer switches, the switchpack will become unresponsive.

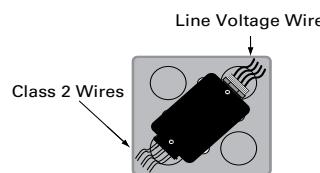

Cycle power to the powerpack. Remove power for more than 10 seconds and the return power. The powerpack will begin normal operation. Ensure the transfer delay time on the transfer switch is either less than 3 seconds or greater than 5.5 seconds.

Mounting

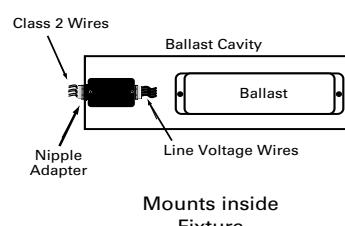

Note: If installing powerpacks where a UL1008 switch is being used for emergency power, ensure the 1008 switch timer to switch from normal to emergency power is less than 3 seconds or greater than 5.5 seconds.

Five year warranty

Overview

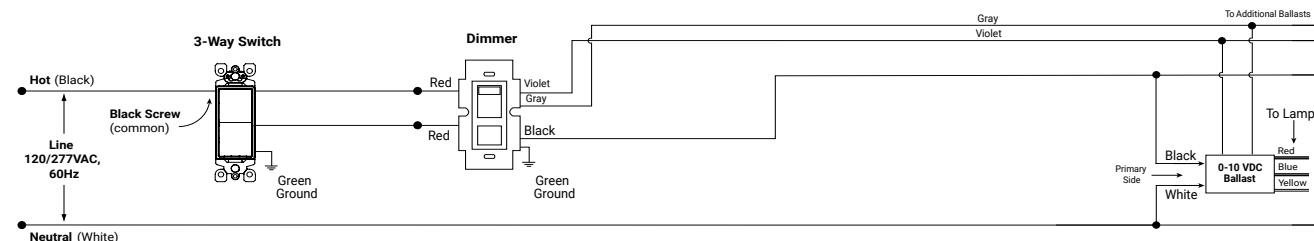

The 0-10V Decorator Dimmer provides full-range classic linear-slide dimming for 0-10 Volt compatible dimmable light sources. These units are ideal for light commercial applications and are compatible with decorator style devices and wallplates. Units feature a preset "ON/OFF" switch that automatically returns controlled light(s) to a preset level without disturbing the brightness level. The device is designed for both Single-pole (one location) and 3-way (multi-location) applications.

Greengate**0-10V Preset Slide Dimmer Wallstation****Wiring Diagrams**

Lights turn ON to the brightness level set by the dimmers slide control lever. Lighting can be turned on from either the dimmer or a switch location if used in a three way installation.

Single Location Control**Single Location Control with SP20-RD4 switchpacks**

Note: DLC-PD-DIM can be added to this configuration to provide continuous daylighting of the 0-10V loads. The device with the lowest 0-10V value will hold the lighting at that level.

Two Location Control

Control Systems

- Greengate

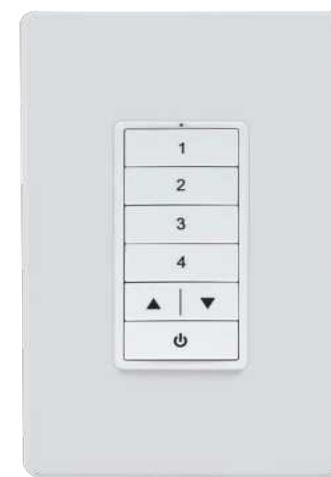

Cooper Lighting Solutions has developed recommended guidelines for cleaning our products that will not impact the operation or finish of the product.

Image for reference only

Recommended cleaning tips:

- **Never spray any fluids directly into the device.**
- **Use of ammonia-based or VOC cleaners on this device must be avoided.** Prolonged use may cause loss of integrity and expose electrified components. If this occurs, turn OFF power to the unit and replace.
- **Use a damp rag or single-use wipe** to avoid excess liquid penetrating the device.
- Be sure to wipe up remaining excess liquid after cleaning.
- Ensure the cleaning agent used does not have harsh chemicals such as bleach, ammonia, highly alkaline or concentrated acids (such as hydrochloric acid that can be found in household cleaners such as toilet bowl cleaners, bathroom tile and porcelain cleaners) as they could damage the device, causing them to become brittle and discolored.
- Cooper Lighting Solutions recommends the use of a mild liquid detergent and water to clean the devices. Single use wipes (e.g. Lysol brand or equivalent) are acceptable to use for cleaning the devices, however the single-use wipes **cannot contain bleach, ammonia, highly alkaline or concentrated acids.**

WARNING

This product is not intended for use in applications involving the use of ammonia-based or VOC cleaners.

Prolonged use may cause loss of integrity and expose electrified components.

If this occurs, turn OFF power to the unit and replace.

Recommended cleaning instructions:

- **Never spray any fluids directly into the device.**
- Apply the mild liquid detergent to a damp cloth or paper towel. Single use wipes (e.g. Lysol brand or equivalent) are acceptable to use for cleaning the devices, however single-use wipes cannot contain bleach, ammonia, highly alkaline or concentrated acids.
- If excess liquid is present, remove by wringing out the cloth or paper towel to avoid liquid penetration into the device.
- Clean the Cooper Lighting Solutions device by wiping over the surface with the damp cloth.
- Remove an excess liquid remaining on the device with a dry cloth or paper towel.
